Balanced Drug-Prevention Strategy: A Conceptual Map; 2. Drug Users and Drug Dealers; 3. Is Addiction a Chronic, Relapsing Disease?; 4. Is Drug Addiction a Brain Disease?; 5. If Addiction Is Involuntary, How Can Punishment Help?; 6. Controlling Drug Use and Crime with Testing, Sanctions, and Treatment; 7. Limits on the Role of Testing and Sanctions; 8. How Should Low-Level Drug Dealers Be Punished?; 9. Reflections on Drug Policy and Social Policy; Postscript; Contributors

Sommario/riassunto

This book is the culmination of five years of debate among distinguished scholars in law, public policy, medicine, and biopsychology, about the most difficult questions in drug policy and the study of addictions. Do drug addicts have an illness, or is the addiction under their control? Should they be treated as patients or as criminals? Challenging the conventional wisdom, the authors show that these standard dichotomies are false.
