on global air pollution problems / Johan C.I. Kuylenstierna, W. Kevin Hicks and Michael J. Chadwick Influence of climate variability and change on the structure, dynamics and exploitation of marine ecosystems / Manuel Barange Rising sea levels : potential impacts and responses / Robert J. Nicholls Climate change, global food supply and risk of hunger / Martin L. Parry and Matthew T.J. Livermore Global environmental changes and human health / Michael V. Ahern and Anthony J. McMichael Corporate environmental performance / Frans Berkhout

Sommario/riassunto

Few people today are unaware of the far-reaching effects of global environmental change, and it is now generally accepted that human activities are the root cause of the changes in climate. Global Environmental Change provides a balanced overview of the problems associated with global warming. Commencing with a chapter on the evidence for global warming presented by Sir John Houghton, the book then goes on to discuss the many problems associated with air pollution. Subsequent chapters cover rising sea levels, the effect of climate change on human health and the role of environmental performance on industry,
