| Sommario/riassunto | Does getting online seem overwhelmingly difficult? Are you paying too |

much for your hosting solution? Have you always wanted to have a blog but don't know where to start? Do you settle for a Facebook page for your business website but know you need more? The solution to these problems is choosing the right tools. This book will guide you through the process of setting up a Publii-based publishing platform and hosting your site for free on GitHub. Publii is a free, open source, desktop application that runs on Windows, Mac, and Linux and makes building the website or blog you dream of is a simple process. This book walks you through the process of installing and using Publii, setting up accounts on GitHub and hosting a static blog or website there. You will gain background insights on here to get no-cost imagery for website, how to leverage AI to generate ideas, outlines, and images. You'll also review search engine optimization (SEO) best practices to ensure your site is searchable. Designing Websites with Publii and GitHub Pages is your roadmap to creating a website and understanding how the publishing workflow works. You will: Use text editors such as WYSIWYG, Block, and Markdown Make a page from a post. Work on advanced processes such as installing themes and plugins with Publii Manage and back up your data Explore GDPR and cookie banner considerations.
