   Pubbl/distr/stampa Leipzig, : Valentin Schumann, 1521

   Descrizione fisica Online resource ([16] leaves : woodcuts , (8vo))

   Lingua di pubblicazione Tedesco

   Formato Materiale a stampa

   Livello bibliografico Monografia

   Note generali Reproduction of original in The Wellcome Library, London.

2. **Record Nr.** UNINA9910785909603321

   Autore Bettez Silvia Cristina

   Titolo But don't call me white [[electronic resource]] : mixed race women exposing nuances of privilege and oppression politics / / Silvia Cristina Bettez

   Pubbl/distr/stampa Rotterdam, : Sense Publishers, 2012

   ISBN 9786613696175
   1-280-78578-0
   94-6091-693-7

   Edizione [1st ed. 2011.]

   Descrizione fisica 1 online resource (251 p.)

   Collana Breakthroughs in the sociology of education

   Disciplina 306.43

   Soggetti Racially mixed people - United States - Social conditions
   Women - United States - Social conditions
   Intercultural communication
   Oppression (Psychology)
   Sociology

   Lingua di pubblicazione Inglese

   Formato Materiale a stampa

   Livello bibliografico Monografia

Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Preliminary Material -- Exposing Methods and Positionality -- Resisting Theoretical Disembodiment: Claiming Space in the Research and Theories Conversations -- Racial and Ethnic Positionalities -- Outsider/Insider -- Chameleons -- Forced "Passing" -- Secret Agent Insiders to White People -- Bridge Builders, Translators, and Allies -- Exposing Analysis -- Appendix A -- Notes -- References -- Index.
Sommario/riassunto	Highlighting the words and experiences of 16 mixed race women (who have one white parent and one parent who is a person of color), Silvia Bettez exposes hidden nuances of privilege and oppression related to multiple positionalites associated with race, class, gender and sexuality. These women are "secret agent insiders" to cultural Whiteness who provide unique insights and perspectives that emerge through their mixed race lenses. Much of what the participants share is never revealed in mixed – White/of color – company. Although critical of racial power politics and hierarchies, these women were invested in cross-cultural connections and revealed key insights that can aid all in understanding how to better communicate across lines of cultural difference. This book is an invaluable resource for a wide range of activists, scholars and general readers, including sociologists, sociologists of education, feminists, anti-oppression/social justice scholars, critical multicultural educators, and qualitative researchers who are interested in mixed race issues, cross cultural communication, social justice work, or who simply wish to minimize racial conflict and other forms of oppression. "Theoretically grounded and with vivid detail, this book amplifies the voices of mixed race women to trouble and expand our understandings of race, gender, hybridity and education. Silvia Bettez fills a stark gap in the research literature, and sets the bar high for what comes next." - Kevin Kumashiro, editor of Troubling Intersections of Race and Sexuality: Queer Students of Color and Anti-Oppressive Education "In But Don't Call Me White, Silvia Bettez accomplishes the difficult task of presenting complex theories in accessible ways while introducing the reader to the intersectional nature of identities in the 21st century. Through the voices of her participants, Bettez illuminates aspects of gender, race, sexuality and social class that cannot be discerned when examined in isolation, and she does so in an engaging manner. In addition to presenting a model of excellent qualitative research, the book makes a valuable contribution to mixed race studies, gender studies, and education." - Kristen A. Renn, Associate Professor at Michigan State University "Silvia Bettez has given us a window into lives that are marked by borders of our own racist creations. Yet these women soar and inspire. They are insightful and beautiful. They teach us the limits of racism and the power of a future where race is mezcla not marker. " - George W. Noblit, Joseph R. Neikirk, Distinguished Professor of Sociology of Education, University of North Carolina at Chapel Hill Silvia Cristina Bettez teaches about issues of social justice and is an Assistant Professor of Cultural Foundations in the School of Education at the University of North Carolina at Greensboro.

3.	Record Nr.	UNINA9910790878403321

	Sommario/riassunto	Takes a look at the decade in America when demonstrations were commonplace and traditional values were questioned and presents American history through the eyes and ears of everyday Americans. Representing all classes, dozens of occupations, and all regions of the country, this book includes 30 profiles of individuals and families-- their life at home, on the job, and in their neighborhood--with lots of photos and historical images of the time, including the African American in Washington, D.C. who taught himself how to win a gold

medal for weight lifting in the 1960s Olympics, to the Nashville country music record producer who signed Loretta Lynn, Patsy Cline, and Chet Atkins.

	Nota di contenuto	Introduction to the Mycorrhiza Optimization Algorithm -- Theory for the Mycorrhiza Optimization Algorithm -- Background for the Mycorrhiza Algorithm -- Problem Definition -- CMOA – Continuous Mycorrhiza Optimization Algorithm -- DMOA – Discrete Mycorrhiza Optimization Algorithm -- Conclusions of the Mycorrhiza Optimization Algorithm.
	Sommario/riassunto	This book provides two new optimization algorithms to address real optimization problems. Optimization is a fundamental concept in engineering and science, and its applications are needed in many fields. From designing products and systems to developing algorithms and models, optimization plays a critical role in achieving efficient and effective solutions to complex problems. Optimization algorithms inspired by nature have proven effective in solving a wide range of

problems, including those in engineering, finance, and machine learning. These algorithms are often used when traditional optimization techniques are impractical due to the size or complexity of the problem. In this book, we are presenting two new optimization algorithms inspired by plant roots and the Mycorrhiza Network. The first algorithm is called the Continuous Mycorrhiza Optimization Algorithm (CMOA), which was proposed based on the model of the Continuous Lotka-Volterra System Equations. The second algorithm is called the Discrete Mycorrhiza Optimization Algorithm (DMOA), which design based on the model of Discrete Lotka-Volterra System Equations. By mastering the proposed algorithms, the readers able to develop innovative solutions that improve efficiency, reduce costs, and improve performance in the corresponding field of work.
