

1. Record Nr.	UNINA9910482867703321
Autore	Qi Fanyu
Titolo	Atlas of Mineral Deposits Distribution in China (2020)
Pubbl/distr/stampa	Springer Nature, 2021 Singapore : , : Springer Singapore Pte. Limited, , 2021 ©2021
ISBN	981-16-0972-1
Descrizione fisica	1 online resource (99 pages)
Collana	The China Geological Survey
Altri autori (Persone)	LiXiaolei ShangYuntao MengJie GaoXuezheng KongZhaoyu LiHaixin YanHaifei
Soggetti	Geology & the lithosphere Mineralogy & gems Earth sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This open access book includes instruction of national mineral database 2020 and atlas of national mineral deposits distribution derived from national mineral database 2020. National mineral database 2020 is based on data from National Geological Archives China(NGAC). Moreover, it introduces the construction method and updates maintenance mechanism of the mineral deposits database and proposes the concept of updating data based on collected archives. The construction guideline on national mineral deposits database provides guiding framework for the future development on geological database.
