

1. Record Nr.	UNINA9910482985403321
Titolo	Light metals 2021 : 50th anniversary edition // Linus Perander, editor
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-65396-X
Descrizione fisica	1 online resource (1,049 pages)
Collana	Minerals, Metals & Materials Series
Disciplina	669.72
Soggetti	Light metals
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Contents -- About the Editor -- Program Organizers -- Aluminum Committee 2020-2022 -- Part I Alumina and Bauxite -- 1 The Application of Intelligent Control to Red Mud Settling and Washing in an Alumina Refinery -- 2 Alumina Refinery Volume Control -- 3 The Study of TCA Applied in Organic Removal from Sodium Aluminate Solution -- 4 Flotation Desulfurization of Acidified High-Sulfur Bauxite: Effects of Regulators -- 5 Optimization of Zinc Removal Process in Sodium Aluminate Solution Based on Orthogonal Experiment -- 6 Collection and Selectivity Contrast of Propyl Gallate and Sodium Oleate for Diaspore and Kaolinite Flotation -- 7 Effect of High Shear Agitation on Surface Properties of Diaspore and Kaolinite -- 8 Silicon Rich Iron Alloy from Bauxite Residue -- 9 Bauxite Residue Neutralization Potential Using Biogenic Sulfuric and Citric Acids -- 10 Study on the Acid Leaching of Metal Components in Bayer Red Mud -- 11 Gravity Methods Applied to Bauxite Residue for Mineral Pre-concentration -- Part II Aluminum Alloys, Processing and Characterization -- 12 Anodization Compatibility of Eutectic Aluminum-Cerium Alloys -- 13 Al-Sm Alloys Under Far-From-Equilibrium Conditions -- 14 Effect of Minor Additives to Al-Zn-Mg Alloys on Welding and Corrosion Performance for Building Constructions -- 15 Mechanism Behind Al/Cu Interface Reaction: The Kinetics and Diffusion of Cu in Forming Different Intermetallic Compounds -- 16 Phase Formation of Mo- and Cr-Rich Compounds in an Al-Si Cast Alloy -- 17 Understanding the Effect of Quench Delay

and Alloy Chemistry on Various 6000 Series Alloy Systems -- 18 Effect of Heat Treatment on the Microstructure and Mechanical Properties of LB-PBF AlSi10Mg and ScAlMg alloy.

19 Thermal Properties of Hybrid Al-Cu-Components Produced by Combining Powder Pressing and Semi-solid Forming Strategies -- 20 Simulations of Wear-Induced Microstructural Evolution in Nanocrystalline Aluminum -- 21 High-Throughput Aluminum Alloy Discovery Using Laser Additive Manufacturing -- 22 Manufacturing A206 Aluminum Alloy by Step Sand Casting: Effect of Solidification Time on Mechanical and Surface Properties of the Cast Samples Using Experimental and Simulation Results -- 23 Experimental and Numerical Examinations Regarding the Material Flow of Combined Rolling Extrusion Process -- 24 Comparison of Simulation and Real Life to Set Up a Holistic Approach for the Extrusion Process -- 25 Computational Simulation of Nanoparticle Distributions in Metal Matrix Composite Casting Processes -- 26 Effect of Thermomechanical Processing on Strengthening of the 5181 Alloy (with 0.03% Sc) Sheets for Preservation of 40% Improved Strength Compared with 5083 -- 27 The Effect of Rare Earth Mischmetal on the High Temperature Tensile Properties of an A356 Aluminum Alloy -- 28 Effects of Ultrasonic Melt Processing on Microstructure, Mechanical Properties, and Electrical Conductivity of Hypereutectic Al-Si, Al-Fe, and Al-Ni Alloys with Zr Additions -- 29 The Corrosion Behavior of 5xxx and 6xxx Aluminum Alloys with Trace Calcium -- 30 Review of Retrogression Forming and Reaging for AA7075-T6 Sheet -- 31 Fatigue and Failure Analysis of an Additively Manufactured Contemporary Aluminum Alloy -- 32 Investigation of Weld Quality for Friction Stir Welding of Extruded 6XXX Series Aluminium Alloys -- 33 The Effect of AlEr Particles on the Structure and Mechanical Properties of an Al-Mg Alloy.

34 Microstructure Evolution of an Al-Fe-Ni Alloy with Zr and Sc Additions Upon Different Cooling Rates During Solidification for Improving the Mechanical and Electrical Conductivity Properties -- 35 Microstructure and Mechanical Properties of a Precipitation-Hardened Al-Mn-Zr-Er Alloy -- 36 Characterization of the Microstructure of Al-Mg Alloy Matrix Syntactic Foam by Three-Dimensional Analysis -- 37 Thermal Analysis of the Solidification Behavior of AA7075 Containing Nanoparticles -- 38 Microstructural Evolution of Ultra-Fine Grained (UFGs) Aluminum in Tribological Contacts -- 39 Microchemistry Evolution for 8xxx Alloys by Homogenization -- 40 Evaluation of Microstructures and Hardness of Al-10Si-0.45Mg-0.4Sc Alloy Powders -- 41 Shear Assisted Processing and Extrusion of Aluminum Alloy 7075 Tubing at High Speed -- 42 Shear Assisted Processing and Extrusion of Thin-Walled AA6063 Tubing -- 43 Influence of the Quench Rate and Trace Elements on 6XXX Alloys -- 44 The Combined Method for Producing Long Products from Aluminium and Aluminium Alloys -- 45 Effect of Extrusion Process on Mechanical, Welding, and Corrosion Behaviour of 6XXX Series of Aluminium Alloys -- 46 Development and Characterization of the Integrally Stiffened Cylinder (ISC) Process for Launch Vehicles and Aircraft Fuselage Structures -- 47 TIG Welding of Dissimilar High-Strength Aluminum Alloys 6061 and 7075 with Nano-Treated Filler Wires -- Part III Aluminum Reduction Technology -- 48 Optimization of Thermal Characteristics and "Output Side Energy Saving" of Aluminum Reduction Cell -- 49 R&D Projects for Improving Aluminium Smelting Technology: An Energy Reduction Initiative -- 50 Mass Transport by Waves: Bath-Metal Interface Deformation, Rafts Collision and Physical Model -- 51 Modeling Anode Current Pickup After Setting.

52 Superconductor Busbars-High Benefits for Aluminium Plants -- 53

Coupled SPH-DEM to Simulate the Injection of a Powder into a Liquid with Heat Transfer and Phase Change -- 54 Individual Anode Current Monitoring During Aluminum Reduction Cell Power Reduction -- 55 Carbon Dust-Its Short-Term Influence on Potroom Operations During Anode Change -- 56 Experience with Lengthy Pot Hibernation at Alcoa Baie-Comeau -- 57 The Rise and Fall of CVG Venalum Primary Aluminium Plant -- 58 Prevention and Control Measures of the Cathode Voltage Drop Rise of Aluminum Electrolytic Cell Due to Unstable Power Supply Load -- 59 The Aluminium Electrolysis Cell Heat Balance Challenge Under Low Voltage -- 60 Production Management of Aluminum Electrolysis at Super Low Voltage -- 61 Improvement to Alpsys Instability and Alumina Feeding Control -- 62 Low and High Voltage PFC Slope Coefficient Monitoring During Pot Start-Up -- 63 Research and Application of Direct Welding Technology on Super Large Section Conductor -- 64 Latest Developments in GTC Design to Reduce Fluoride Emissions -- 65 Process and Environmental Aspects of Applying Unshaped Carbon Materials for Cell Lining Purposes -- 66 Research on Wet Acid-Free Treatment Technology for SPL -- 67 Characterisation of Powders-Precondition for Plant Engineering -- 68 Gas Treatment in the GE Pot Integrated ABART Modules (PIA) -- 69 Instant Monitoring of Aluminum Chemistry in Cells Using a Portable Liquid Metal Analyzer -- 70 Dissolution Characteristics and Concentration Measurements of Alumina in Cryolite Melts -- 71 On Gaseous Emissions During Alumina Feeding -- 72 On the Feasibility of Using Low-Melting Bath to Accommodate Inert Anodes in Aluminium Electrolysis Cells -- 73 Electrochemical Reduction and Dissolution of Aluminium in a Thin-Layer Refinery Process. 74 On Optimal Control of AIO Concentration in the Aluminum Reduction Cell -- 75 Influence of Additives on Alumina Dissolution in Superheated Cryolite Melts -- Part IV Aluminum Reduction Technology Across the Decades: An LMD Symposium Honoring Alton T. Tabereaux and Harald A. Øye -- 76 Alton Tabereaux: A Humble Individual Who Dedicates His Lifetime to Aluminum-An Aluminum Legend of Our Time -- 77 Awakening of the Aluminum Industry to PFC Emissions and Global Warming -- 78 Application and Adaptability of MHD Stability Computation for Modern Aluminium Reduction Cells at Extreme Conditions of Low ACD -- 79 Investigation of Cyclic Process Variations Within Hall-Heroult Reduction Cells -- 80 In-Line Cell Position and Anode Change Effects on the Alumina Dissolution -- 81 History of Computer Control of Aluminum Reduction Cells -- 82 Balancing the Modern Challenge of Operating Aluminium Smelters-Minimizing Energy Consumption, Minimizing Greenhouse Gas Emissions, and Maximizing the Productivity of Assets -- 83 Hydro's New Karmøy Technology Pilot: Start-Up and Early Operation -- 84 AP12 Low-Energy Technology at ALRO Smelter -- 85 New Phase in Upgrade of Söderberg Technology at RUSAL's Smelters -- 86 Stepped Collector Bar-Continuous Developments in Low Amperage Hall-Heroult Cell to Reduce Voltage Drop -- 87 Biocarbon in the Aluminium Industry: A Review -- 88 Forty Years of Trondheim International Course on Process Metallurgy of Aluminium -- 89 Establishing a Chemical Model of the Melt in the Cathode -- 90 Heating New Anodes Using the Waste Heat of Anode Butts Establishing the Interface Thermal Contact Resistance -- 91 Forty Years of Cathode Block Evolution at EGA -- 92 Wetting of Carbon Cathodes by Molten Electrolyte and Aluminium -- 93 Optimising Anode Performance in Albras Potlines -- Part V Cast Shop Technology. 94 Impact of COVID-19 Pandemic on British Foundries.
