

1. Record Nr.	UNINA9910483022803321
Titolo	Journal on Data Semantics II // edited by Stefano Spaccapietra, Elisa Bertino, Sushil Jajodia, Roger B. King, Dennis McLeod, Maria E. Orłowska, Leon Strous
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2005
ISBN	3-540-30567-X
Edizione	[1st ed. 2005.]
Descrizione fisica	1 online resource (XI, 223 p.)
Collana	Journal on Data Semantics ; ; 3360
Altri autori (Persone)	SpaccapietraS
Disciplina	005.74
Soggetti	Data structures (Computer science) Information theory Database management Information storage and retrieval systems Artificial intelligence Application software Computer networks Data Structures and Information Theory Database Management Information Storage and Retrieval Artificial Intelligence Computer and Information Systems Applications Computer Communication Networks
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	International Conference on Ontologies, DataBases, and Applications of Semantics for Large Scale Information Systems (ODBase 2003) -- Incrementally Maintaining Materializations of Ontologies Stored in Logic Databases -- Ontology Translation on the Semantic Web -- Compound Term Composition Algebra: The Semantics -- Dynamic Pattern Mining: An Incremental Data Clustering Approach -- International Conference on Cooperative Information Systems (CoopIS 2003) -- A Knowledge Network Approach for Implementing Active Virtual Marketplaces --

Stream Integration Techniques for Grid Monitoring -- 6th IFIP TC 11 WG 11.5 Working Conference on Integrity and Internal Control in Information Systems (IICIS 2003) -- Information Release Control: A Learning-Based Architecture -- Enforcing Semantics-Aware Security in Multimedia Surveillance.

Sommario/riassunto

The LNCS Journal on Data Semantics is devoted to the presentation of notable work that, in one way or another, addresses research and development on issues related to data semantics. Based on the highly visible publication platform Lecture Notes in Computer Science, this new journal is widely disseminated and available worldwide. The scope of the journal ranges from theories supporting the formal definition of semantic content to innovative domain-specific applications of semantic knowledge. The journal addresses researchers and advanced practitioners working on the semantic web, interoperability, mobile information services, data warehousing, knowledge representation and reasoning, conceptual database modeling, ontologies, and artificial intelligence.
