

1. Record Nr.	UNINA9910483026703321
Titolo	Computational Science and Its Applications - ICCSA 2005 : International Conference, Singapore, May 9-12, 2005, Proceedings, Part IV // edited by Osvaldo Gervasi, Marina L. Gavrilova, Vipin Kumar, Antonio Laganà, Heow Pueh Lee, Youngsong Mun, David Taniar, Chih Jeng Kenneth Tan
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2005
Edizione	[1st ed. 2005.]
Descrizione fisica	1 online resource (XXVII, 1353 p.)
Collana	Theoretical Computer Science and General Issues, , 2512-2029 ; ; 3483
Altri autori (Persone)	GervasiOsvaldo
Disciplina	004
Soggetti	Computer science Software engineering Numerical analysis Computer networks Computer simulation Image processing - Digital techniques Computer vision Theory of Computation Software Engineering Numerical Analysis Computer Communication Networks Computer Modelling Computer Imaging, Vision, Pattern Recognition and Graphics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Information and Communication Technology (ICT) Education Workshop -- Digital Device for Ubiquitous Computing Workshop -- Optimization: Theories and Applications (OTA) 2005 Workshop -- Tracks.
Sommario/riassunto	The four volume set assembled following The 2005 International Conference on Computational Science and its Applications, ICCSA 2005, held in Suntec International Convention and Exhibition Centre, Singapore, from 9 May 2005 till 12 May 2005, represents the ?ne

collection of 540 refereed papers selected from nearly 2,700 submissions. Computational Science has firmly established itself as a vital part of many scientific investigations, affecting researchers and practitioners in areas ranging from applications such as aerospace and automotive, to emerging technologies such as bioinformatics and nanotechnologies, to core disciplines such as mathematics, physics, and chemistry. Due to the sheer size of many challenges in computational science, the use of supercomputing, parallel processing, and sophisticated algorithms is inevitable and becomes a part of fundamental theoretical research as well as endeavors in emerging fields. Together, these far reaching scientific areas contribute to shape this Conference in the realms of state-of-the-art computational science research and applications, encompassing the facilitating theoretical foundations and the innovative applications of such results in other areas.
