Titolo	From disintegration to reintegration : : Eastern Europe and the former Soviet Union in international trade // edited by Harry G. Broadman
Pubbl/distr/stampa	Washington, DC : , : World Bank, , [2005] copyright 2005
ISBN	1-280-34880-1 9786610348800 0-8213-6198-8
Descrizione fisica	xxv, 414 pages : illustrations, color map ; ; 26 cm
Altri autori (Persone)	BroadmanHarry G
Disciplina	382/.30947
Soggetti	Europe, Eastern Commerce Europe, Eastern Commercial policy Former Soviet republics Commercial policy Former Soviet republics Commerce
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Foreword; Acknowledgments; Acronyms and Abbreviations; Overview; Figures; Tables; PART I THE TRADE RECORD OF EASTERN EUROPE AND THE FORMER SOVIET UNION SINCE THE TRANSITION; Boxes; PART II THE ROLE OF THE TRADE REGIME; PART III THE INFLUENCE OF "BEHIND-THE-BORDER" POLICIES AND INSTITUTIONS; Bibliography; Index
Sommario/riassunto	As the world marketplace becomes ever more globalized, much is at stake for the prosperity of hundreds of millions of people in Europe and Central Asia as the region's transition process continues through its second decade. Understanding the underlying dynamics shaping the contours and most salient impacts of international integration that have emerged-and likely to emerge prospectively-in the region is thus a crucial challenge for the medium term economic development agenda, not only for policymakers in the countries on themselves, but also for their trading partners, the international financ

Sommario/riassunto	<p>Steel is a critical material in our societies and will remain an important one for a long time into the future. In the last two decades, the world steel industry has gone through drastic changes and this is predicted to continue in the future. The Asian countries (e.g. China, India) have been dominant in the production of steel creating global over-capacity, while the steel industry in the developed countries have made tremendous efforts to reinforce its global leadership in process technology and product development, and remain sustainable and competitive. The global steel industry is also facing various grand challenges in strict environmental regulation, new energy and materials sources, and ever-increasing customer requirements for high quality steel products, which has been addressed accordingly by the global iron and steel community. This Special Issue, "Ironmaking and Steelmaking", released by the journal Metals, published 33 high quality articles from the international iron and steel community, covering the state-of-the-art of the ironmaking and steelmaking processes. This includes fundamental understanding, experimental investigation, pilot plant trials, industrial applications and big data utilization in the improvement and optimization of existing processes, and research and development in transformative technologies. It is hoped that the creation of this special issue as a scientific platform will help drive the</p>

iron and steel community to build a sustainable steel industry.

Sommario/riassunto	This two-volume set constitutes the post-conference proceedings of the 4th EAI International Conference on Advanced Hybrid Information Processing, ADHIP 2020, held in Binzhou, China, in September 2020. Due to COVID-19 the conference was held virtually. The 89 papers

presented were selected from 190 submissions and focus on theory and application of hybrid information processing technology for smarter and more effective research and application. The theme of ADHIP 2020 was “Industrial applications of aspects with big data”. The papers are named in topical sections as follows: Industrial application of multi-modal information processing; Industrialized big data processing; Industrial automation and intelligent control; Visual information processing.
