Record Nr.	UNINA9910483034403321
Titolo	Health Information Science [[electronic resource]]: 6th International Conference, HIS 2017, Moscow, Russia, October 7-9, 2017, Proceedings / / edited by Siuly Siuly, Zhisheng Huang, Uwe Aickelin, Rui Zhou, Hua Wang, Yanchun Zhang, Stanislav Klimenko
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
ISBN	3-319-69182-1
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (X, 183 p. 58 illus.)
Collana	Information Systems and Applications, incl. Internet/Web, and HCI ; ; 10594
Disciplina	610.285
Soggetti	Health informatics Artificial intelligence Data mining Application software Optical data processing Mathematical logic Health Informatics Artificial Intelligence Data Mining and Knowledge Discovery Information Systems Applications (incl. Internet) Image Processing and Computer Vision Mathematical Logic and Formal Languages
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Intro Preface Organization Contents Software for Full-Color 3D Reconstruction of the Biological Tissues Internal Structure Abstract 1 Introduction 2 Making of an Images Set of Histological Sections 3 Creation of -Sections and Software Development 4 Examples of Images Reconstruction in Arbitrary Sections 5 Information System for Modeling 6 Conclusions Acknowledgments References Epileptic Seizure Detection Using EEGs Based on Kernel Radius of Intrinsic Mode Functions 1

1.

Introduction -- 2 Methods -- 2.1 Empirical Mode Decomposition -- 2.2 Kernel-Radius-Based Feature Extraction Method -- 3 Experiments --3.1 Database -- 3.2 The Experimental Results and Discussions -- 4 Conclusion -- References -- Some Directions of Medical Informatics in Russia -- Abstract -- 1 Gelfand's Approach to Medical Informatics --1.1 Personal Applicability of the Result -- 1.2 Using the Experience of a Doctor -- 1.3 Proof of the Result -- 2 Medical Information System "Transfusiology" -- 3 Time-Oriented Multi-image Case History - Way to the "Disease Image" Analysis -- Acknowledgements -- References -- A Computer Simulation Approach to Reduce Appointment Lead-Time in Outpatient Perinatology Department ... -- Abstract -- 1 Introduction --2 Related Work -- 3 Modeling the Perinatology Department: A Case Study in a Maternal-Child Hospital -- 4 Conclusions and Future Work -- References -- Engaging Patients, Empowering Doctors in Digitalization of Healthcare -- Abstract -- 1 Introduction -- 2 Methods and Discussion -- 3 Conclusion -- Acknowledgements -- References -- Developing a Tunable Q-Factor Wavelet Transform Based Algorithm for Epileptic EEG Feature Extraction -- Abstract -- 1 Introduction -- 2 Datasets and Methods -- 2.1 Experimental Data -- 2.2 Methodology --3 Performance Measurements -- 4 Experimental Results and Discussions.

5 Conclusions -- References -- Granular Computing Combined with Support Vector Machines for Diagnosing Erythemato-Squamous Diseases -- 1 Introduction -- 2 The Basic Knowledge of GrC and SVM -- 2.1 The Basic Idea of GrC -- 2.2 Support Vector Machines -- 3 GrC and SVM Based Feature Selection Algorithm -- 3.1 Feature search strategies -- 3.2 Search for Best Parameters -- 3.3 GrC Combined SVM Feature Selection Algorithm -- 4 Experiments and Results -- 4.1 The Erythemato-Squamous Diseases Dataset -- 4.2 Experimental Results and Analysis -- 5 Conclusions -- References -- A Semantically-Enabled System for Inflammatory Bowel Diseases -- 1 Introduction -- 2 System -- 3 Semantic Queries -- 4 Experiments -- 4.1 Basic Information -- 4.2 IBD Onset Distribution -- 4.3 Season and Smoking Factors Analysis -- 5 Related Research -- 6 Conclusions -- References -- Early Classification of Multivariate Time Series Based on Piecewise Aggregate Approximation -- Abstract -- 1 Introduction -- 2 Background -- 3 Related Work -- 4 Multivariate Time Series Early Classification Based on PAA -- 5 Experiment -- 5.1 Dataset -- 5.2 Experiment Results -- 5.3 Parameter Analysis -- 6 Conclusion and Future Work -- References -- A Data-Driven Approach for Discovering the Recent Research Status of Diabetes in China -- Abstract -- 1 Introduction -- 2 Literature Review -- 3 The Data-Driven Approach --4 Results and Discussion -- 5 Summary -- Acknowledgements --References -- Generation of Semantic Patient Data for Depression --Abstract -- 1 Introduction -- 2 Related Work -- 3 Knowledge Integration and Rule Expression of Semantic EMR -- 3.1 Advanced Patient Data Generator -- 3.2 Knowledge and Rule -- 4 Data Integration of Semantic EMR -- 4.1 XML Definition -- 4.2 Semantic Annotation -- 5 Experiments and Applications -- 5.1 Data Storage --5.2 Applications -- 6 Conclusion and Future Work. References -- Analyses of the Dual Immune Roles Cytokines Play in Ischemic Stroke -- Abstract -- 1 Introduction -- 2 Materials and Methods -- 2.1 Microarray Datasets and Normalization -- 2.2 Functional Terms -- 2.3 Differential Expression Analyses -- 2.4 Enrichment Analyses -- 3 Results and Discussion -- 3.1 Differential Expressed Cytokine Genes -- 3.2 miRNAs as Regulators of E-CKs --3.3 E-CK Network -- 4 Sources of Funding -- References --Multidimensional Analysis Framework on Massive Data of Observations

	of Daily Living Abstract 1 Introduction 2 Related Works 3 ODLs Network 4 Structure Dimensions and ODLs Cube 4.1 ODLs Cube 4.2 Structure Dimension and ODLs Cube Hierarchy 5 Conclusions and Future Works References Numerical Modeling of the Internal Temperature in the Mammary Gland 1 Introduction 2 Mathematical Model 3 Results of Computer Modeling 4 Conclusion References Research on Multidimensional Modelling for Personal Health Record 1 Introduction 2 Related Work 2.1 Research on Ontology-Based Modelling Techniques 2.2 Research on Multidimensional Knowledge Organization 2.3 Research on Personal Health Record and Application 3 Multidimensional Features of Personal Health Record 4 Modelling Personal Health Record 4.1 The HL7 V3 Reference Information Model 4.2 The OpenEHR Information Model 4.3 The Personal Health Record Ontology Model 4.4 The Hypertension PHR Ontology Model 5 Conclusion and Future Work References Constructing Knowledge Graphs of Depression 1 Introduction 2 Challenges 3 Knowledge Graphs 4 Knowledge Resources 5 Integration 6 Use Cases 7 DepressionKG System 8 Discussion and Conclusion References Constructing Three-Dimensional Models for Surgical Training Simulators Abstract 1 Introduction. 2 Principal Steps of SFM Method 3 Algorithms of SLAM Family 3.1 ORB-SLAM 3.2 LSD-SLAM 4 Reconstruction of Surface and Superposition of Textures 4.1 Construction of a Dense Points Cloud 4.2 Reconstruction of Model Surface from a Dense Points Cloud 4.3 Photorealistic Texture Mapping onto the Constructed Surface 5 Conclusion References A Framework for Automated Knowledge Graph Construction Towards Traditional Chinese Medicine Abstract 1 Introduction 2 Related Work 3 The Framework 4 Experiments and Results 5 Discussions 6 Conclusions Acknowledgements References Author Index.
Sommario/riassunto	This book constitutes the refereed proceedings of the 6th International Conference on Health Information Science, HIS 2017, held in Moscow, Russia, in October 2017. The 11 full papers and 7 short papers presented were carefully reviewed and selected from 44 submissions. The papers feature multidisciplinary research results in health information science and systems that support health information management and health service delivery. They relate to all aspects of the conference scope, such as medical/health/biomedicine information resources such as patient medical records, devices and equipments, software and tools to capture, store, retrieve, process, analyze, and optimize the use of information in the health domain; data management, data mining, and knowledge discovery, management of public health, examination of standards, privacy and security issues; computer visualization and artificial intelligence for computer aided diagnosis; development of new architectures and applications for health information systems.
