   Sommario/riassunto This book constitutes the refereed proceedings of the 14th
                       International Conference on Formal Modeling and Analysis of Timed
                       Systems, FORMATS 2016, held in Quebec, QC, Canada, in August 2016.
                       The 14 papers presented in this volume were carefully reviewed and
                       selected from 32 initial submissions. They are organized in topical
                       sections entitled: modeling timed phenomena; stochasticity and hybrid
                       control; real-time verification and synthesis; workload analysis.
