

1. Record Nr.	UNINA9910483131803321
Titolo	Atlas of Diagnostic Pathology of the Cervix : A Case-Based Approach / / edited by Robert A. Soslow, Kay J. Park, Simona Stolnicu
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2021
ISBN	3-030-49954-5
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (XI, 352 p. 432 illus. in color.)
Disciplina	616.99466
Soggetti	Pathology Gynecology Cancer - Treatment Cancer Therapy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Anatomy, Histology, Cytology, and Colposcopy of the Cervix -- Pathologic Sampling Methods of the Cervix -- Benign Lesions and Physiologic Changes in the Cervix -- Benign Tumors of the Cervix -- Precursor Lesions of the Cervix: Squamous Precursor Lesions -- Precursor Lesions of the Cervix: Glandular Precursor Lesions -- Epithelial Malignant Tumors of the Cervix: Squamous Carcinoma -- Epithelial Malignant Tumors of the Cervix: Endocervical Adenocarcinoma -- Epithelial Malignant Tumors of the Cervix: Other Epithelial Tumors (Adenosquamous Carcinoma, Adenoid Basal Carcinoma, Adenoid Cystic Carcinoma, Undifferentiated Carcinoma) -- Epithelial Malignant Tumors of the Cervix: Neuroendocrine Tumors -- Mesenchymal and Mixed Epithelial–Stromal Malignant Tumors of the Cervix -- Other Tumors of the Cervix (Melanocytic, Germ Cell, Trophoblastic, Lymphoid, and Myeloid Tumors) -- Metastases to the Cervix. .
Sommario/riassunto	This book provides a practical guide to the diagnosis of cervical lesions. Chapters detail recent changes to diagnostic criteria and classification and the impacts these developments have on patient management. The anatomy and histology of the cervix are discussed, along with macroscopic and microscopic changes, prognostic and

predictive parameters, epidemiological data, and staging systems. Atlas of Diagnostic Pathology of the Cervix: A Case-Based Approach utilizes diagnostic algorithms and highlights to offer readers appropriate management criteria and aims to give trainees, practicing pathologists, and gynecologists a case-based approach to the treatment of cervical lesions.
