

1. Record Nr.	UNINA9910483135703321
Autore	Church Kevin E. M.
Titolo	Bifurcation theory of impulsive dynamical systems // Kevin E. M. Church, Xinzhi Liu
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-64533-9
Descrizione fisica	1 online resource (xvii, 388 pages) : illustrations
Collana	IFSR international series on systems science and engineering ; ; Volume 34
Disciplina	515.35
Soggetti	Bifurcation theory System analysis Teoria de la bifurcació Anàlisi de sistemes Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Preface -- Reading Guide -- Contents -- I Impulsive Functional Differential Equations -- I.1 Introduction -- I.1.1 Nonautonomous Dynamical Systems -- I.1.2 History Functions -- I.1.3 The Space RCR of Right-Continuous Regulated... -- I.1.4 Gelfand-Pettis Integration -- I.1.5 Integral and Summation Inequalities -- I.1.6 Comments -- I.2 General Linear Systems -- I.2.1 Existence and Uniqueness of Solutions -- I.2.2 Evolution Families -- I.2.2.1 Phase Space Decomposition -- I.2.2.2 Evolution Families are (Generally) NowhereContinuous -- I.2.2.3 Continuity under the L2 Seminorm -- I.2.3 Representation of Solutions of the ... -- I.2.3.1 Pointwise Variation-of-Constants Formula -- I.2.3.2 Variation-of-Constants Formula in theSpace RCR -- I.2.4 Stability -- I.2.5 Comments -- I.3 Linear Periodic Systems -- I.3.1 Monodromy Operator -- I.3.2 Floquet Theorem -- I.3.3 Floquet Multipliers, Floquet Exponents and... -- I.3.4 Computational Aspects in Floquet Theory -- I.3.4.1 Floquet Eigensolutions -- I.3.4.2 Characteristic Equations for Finitely ReducibleLinear Systems -- I.3.4.3 Characteristic Equations for Systems withMemoryless Continuous Part -- I.3.5 Comments -- I.4

Nonlinear Systems and Stability -- I.4.1 Mild Solutions -- I.4.2  
 Dependence on Initial Conditions -- I.4.3 The Linear Variational  
 Equation and Linearized... -- I.4.4 Comments -- I.5 Existence,  
 Regularity and Invariance of Centre Manifolds -- I.5.1 Preliminaries --  
 I.5.1.1 Spaces of Exponentially Weighted Functions -- I.5.1.2 -  
 Bounded Solutions from Inhomogeneities -- I.5.1.3 Substitution  
 Operator and Modification of Nonlinearities -- I.5.2 Fixed-Point  
 Equation and Existence... -- I.5.2.1 A Remark on Centre Manifold  
 Representations: Graphs and Images -- I.5.3 Invariance and Smallness  
 Properties -- I.5.4 Dynamics on the Centre Manifold -- I.5.4.1 Integral  
 Equation.  
 I.5.4.2 Abstract Ordinary Impulsive Differential Equation -- I.5.4.3 A  
 Remark on Coordinates and Terminology -- I.5.5 Reduction Principle  
 -- I.5.5.1 Parameter Dependence -- I.5.6 Smoothness in the State  
 Space -- I.5.6.1 Contractions on Scales of Banach Spaces -- I.5.6.2  
 Candidate Differentials of the Substitution Operators -- I.5.6.3  
 Smoothness of the Modified Nonlinearity -- I.5.6.4 Proof of  
 Smoothness of the Centre Manifold -- I.5.6.5 Periodic Centre Manifold  
 -- I.5.7 Regularity of Centre Manifolds... -- I.5.7.1 A Coordinate  
 System and Pointwise  $PC_{1,m}$ -Regularity -- I.5.7.2 Reformulation of the  
 Fixed-Point Equation -- I.5.7.3 A Technical Assumption on the  
 Projections  $P_c(t)$  and  $P_u(t)$  -- I.5.7.4 Proof of  $PC_{1,m}$ -Regularity at Zero  
 -- I.5.7.5 The Hyperbolic Part Is Pointwise  $PC_{1,m}$ -Regular at Zero -- I.  
 5.7.6 Uniqueness of the Taylor Coefficients -- I.5.7.7 A Discussion on  
 the Regularity of the Matrices  $\tau_j(t)$  -- I.5.8 Comments -- I.6  
 Computational Aspects of Centre Manifolds -- I.6.1 Euclidean Space  
 Representation -- I.6.1.1 Definition and Taylor Expansion -- I.6.1.2  
 Dynamics on the Centre Manifold in Euclidean Space -- I.6.1.3 An  
 Impulsive Evolution Equation and Boundary Conditions -- I.6.2  
 Approximation by the Taylor Expansion -- I.6.2.1 Evolution Equation  
 and Boundary Conditions for Quadratic Terms -- I.6.2.2 Solution by the  
 Method of Characteristics -- I.6.3 Visualization of Centre Manifolds --  
 I.6.3.1 An Explicit Scalar Example Without Delays -- I.6.3.2 Two-  
 Dimensional Example with Quadratic Delayed Terms -- I.6.3.3 Detailed  
 Calculations Associated with Example I.6.3.2 -- The  $u_{12}$  Coefficient --  
 The  $u_{22}$  Coefficient -- The  $u_{1u_2}$  Coefficient -- I.6.4 The Overlap  
 Condition -- I.6.4.1 Distributed Delays -- I.6.4.2 Transformations that  
 Enforce the Overlap Condition for Discrete Delays -- I.6.5 Comments.  
 I.7 Hyperbolicity and the Classical Hierarchy of Invariant Manifolds -- I.  
 7.1 Preliminaries -- I.7.2 Unstable Manifold -- I.7.3 Stable Manifold --  
 I.7.4 Centre-Unstable Manifold -- I.7.5 Centre-Stable Manifold -- I.7.6  
 Dynamics on Finite-Dimensional... -- I.7.7 Linearized Stability and  
 Instability, Revisited -- I.7.8 Hierarchy and Inclusions -- I.8 Smooth  
 Bifurcations -- I.8.1 Centre Manifolds Depending Smoothly on  
 Parameters -- I.8.2 Codimension-One Bifurcations for Systems with a  
 Single Delay: Setup -- I.8.3 Fold Bifurcation -- I.8.3.1 Example: Fold  
 Bifurcation in a Scalar System with Delayed Impulse -- I.8.3.2  
 Calculation of the Function  $Y_{11}(t)$  for Example I.8.3.1 -- I.8.4 Hopf-  
 Type Bifurcation and Invariant Cylinders -- I.8.4.1 Example: Impulsive  
 Perturbation from a Hopf Point -- I.8.5 Calculations Associated to  
 Example I.8.4.1 -- I.8.5.1 The Projection  $P_c(t)$  and Matrix  $(t)$  -- I.8.5.2  
 Calculation of  $(t)$  and the Matrices  $A(t)$  and  $B$  -- I.8.5.3 Calculation of  
 $n_0(t)$ : A Numerical Routine -- I.8.5.4 Calculation of  $h_2$  -- I.8.6 A Recipe  
 for the Analysis of Smooth Local Bifurcations -- I.8.7 Comments -- II  
 Finite-Dimensional Ordinary Impulsive Differential Equations -- II.1  
 Preliminaries -- II.1.1 Existence and Uniqueness of Solutions -- II.1.2  
 Dependence on Initial Conditions... -- II.1.3 Continuity Conventions:  
 Right- and Left-Continuity -- II.1.4 Comments -- II.2 Linear Systems --

II.2.1 Cauchy Matrix -- II.2.2 Variation-of-Constants Formula -- II.2.3 Stability -- II.2.4 Exponential Trichotomy -- II.2.5 Floquet Theory -- II.2.5.1 Homogeneous Systems -- II.2.5.2 Periodic Solutions of Homogeneous Systems -- II.2.5.3 Periodic solutions of Inhomogeneous Systems -- II.2.5.4 Periodic Systems Are Exponentially Trichotomous -- II.2.5.5 Stability -- II.2.6 Generalized Periodic Changes of Variables -- II.2.6.1 A Full State Transformation and Chain Matrices. -- II.2.6.2 Real Floquet Decompositions -- II.2.6.3 A Real T-Periodic Kinematic Similarity -- II.2.7 Comments -- II.3 Stability for Nonlinear Systems -- II.3.1 Stability -- II.3.2 The Linear Variational Equation... -- II.3.3 Comments -- II.4 Invariant Manifold Theory -- II.4.1 Existence and Smoothness -- II.4.2 Invariance Equation for Nonautonomous... -- II.4.3 Invariance Equation for Systems with... -- II.4.4 Dynamics on Invariant Manifolds -- II.4.5 Reduction Principle for the Centre Manifold -- II.4.6 Approximation by Taylor Expansion -- II.4.7 Parameter Dependence -- II.4.7.1 Centre Manifolds Depending on a Parameter -- II.4.8 Comments -- II.5 Bifurcations -- II.5.1 Reduction to an Iterated Map -- II.5.2 Codimension-one Bifurcations -- II.5.2.1 Fold Bifurcation -- II.5.2.2 Period-Doubling Bifurcation -- Special Case:  $q=1$  -- II.5.2.3 Cylinder Bifurcation -- II.5.3 Comments -- III Singular and Nonsmooth Phenomena -- III.1 Continuous Approximation -- III.1.1 Introduction -- III.1.1.1 Singular Unfolding of an Impulsive Differential Equation -- III.1.1.2 Preliminaries -- III.1.1.3 Time  $q$  Map -- III.1.1.4 The Realization Problem -- III.1.1.5 A Brief Discussion on the Continuity Convention -- III.1.2 Pointwise Convergence and the Candidate... -- III.1.3 Smoothness of the Time  $q$  Map -- III.1.4 Sensitivity and Realization -- III.1.5 An Important Comment (Or Warning)... -- III.1.6 Example: Continuous-Time Logistic... -- III.2 Non-smooth Bifurcations -- III.2.1 Overview -- III.2.1.1 Bifurcations Involving Perturbations of Impulse Times -- III.2.1.2 Bifurcations Involving Crossings of Impulse Times and Delays -- III.2.2 Centre Manifolds Parameterized... -- III.2.2.1 Dummy Matrix System and Robustness of Spectral Separation -- III.2.2.2 Centre Manifold Construction -- III.2.3 Overlap Bifurcations -- III.2.3.1 Floquet Spectrum. -- III.2.3.2 Symmetries of Periodic Solutions -- III.2.3.3 A State Transformation that Eliminates the Delay -- III.2.3.4 Bifurcations of Periodic Solutions -- III.2.3.5 The Introductory Example Revisited -- III.2.4 Comments -- IV Applications -- IV.1 Bifurcations in an Impulsively Damped or Driven Pendulum -- IV.1.1 Stability Analysis: The Model Without Delay -- IV.1.1.1 Downward Rest Position -- Case 1:  $(+1)2\cos^2(T)4$  -- Case 2:  $(+1)2\cos^2(T)> 4$  -- IV.1.1.2 Upward Rest Position -- Case 1:  $(+1)2\cosh^2(T)4$  -- Case 2:  $(+1)2\cosh^2(T)> 4$  -- IV.1.2 Stability Analysis: The Model with Delay -- IV.1.2.1 Downward Rest Position -- IV.1.2.2 Upward Rest Position -- IV.1.3 Cylinder Bifurcation at the Downward... -- IV.1.4 Cylinder Bifurcation at the Downward... -- IV.1.4.1 Floquet Multiplier Transversality Condition -- IV.1.4.2 Computation of the First Lyapunov Coefficient -- IV.2 The Hutchinson Equation with Pulse Harvesting -- IV.2.1 Dummy Matrix System: Setup for the Non-smooth Centre Manifold -- IV.2.2 Dynamics on the Centre Manifold -- IV.2.3 The Transcritical Bifurcation -- IV.3 Delayed SIR Model with Pulse Vaccination and Temporary Immunity -- IV.3.1 Introduction -- IV.3.2 Vaccinated Component Formalism -- IV.3.3 Existence of the Disease-free Periodic Solution -- IV.3.4 Stability of the Disease-free Periodic Solution -- IV.3.5 Existence of a Bifurcation Point -- IV.3.6 Transcritical Bifurcation in Terms of Vaccine Coverage at  $R_0=1$  with One Vaccination Pulse Per Period -- Linearization -- Centre Fibre Bundle -- Projection

of 0 Onto the Centre Fibre Bundle -- Dynamics on the Centre Manifold  
and Bifurcation -- IV.3.7 Numerical Bifurcation Analysis -- IV.4 Stage-  
Structured Predator-Prey System with Pulsed Birth -- IV.4.1 Model  
Derivation -- IV.4.2 Stability of the Extinction Equilibrium -- IV.4.3  
Analysis of Predator-Free Periodic Solution.  
IV.4.3.1 Existence and Uniqueness of the Predator-Free Solution.
