

1. Record Nr.	UNINA9910483167703321
Titolo	Strategies and tools for pollutant mitigation : avenues to a cleaner environment // J. Aravind [and three others], editors
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-63575-9
Descrizione fisica	1 online resource (vii, 450 pages)
Disciplina	628.746
Soggetti	Agriculture - Waste minimization Pollution prevention Bioremediation Agricultural wastes - Recycling Sustainable agriculture
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Contents -- Part I: Reviews on Energy and Environment -- Chapter 1: A Review on Production, Properties, and Applications of Microbial Surfactants as a Promising Biomolecule for Enviro... -- 1 Introduction -- 2 Physical and Chemical Properties of Biosurfactants -- 2.1 Surface and Interface Activity -- 2.2 Tolerance, Toxicity, and Biodegradability -- 2.3 Emulsification and De-emulsification -- 2.4 Foam and Wet Property of Biosurfactants -- 3 Classification and Source of Biosurfactants -- 3.1 Source of Biosurfactant -- 4 Biosurfactant Production -- 4.1 Sampling -- 4.2 Isolation -- 4.3 Screening Methods -- 4.4 Raw Materials for Biosurfactant Production -- 4.5 Media Formulation for Biosurfactant Production -- 4.6 Factors Affecting Biosurfactant Production -- 4.6.1 Carbon Sources -- 4.6.2 Nitrogen Sources -- 4.6.3 Carbon:Nitrogen Ratio -- 4.6.4 Phosphate and Salinity Source -- 4.6.5 Growth Conditions -- 4.7 Biosurfactant Extraction, Purification, and Characterization -- 4.7.1 Biosurfactant Extraction -- 4.7.2 Biosurfactant Purification -- 4.7.3 Biosurfactant Characterization -- 5 Environmental Application of Biosurfactants -- 5.1 Use of Biosurfactant in Contaminated Soils -- 5.2 Applications of

Biosurfactants in Oil Recovery -- 6 Conclusion -- References --  
Chapter 2: Hairy Roots as a Source for Phytoremediation -- 1  
Introduction -- 2 Hairy Roots in Phytoremediation -- 2.1  
Phytoremediation for Heavy Metal Degradation -- 2.2 Phytoremediation  
of Phenols -- 2.3 Phytoremediation of Xenobiotic Compounds -- 2.4  
Phytoremediation of Azo Dyes -- 2.5 Hairy Roots in Other  
Environmental Applications -- 3 Hairy Roots Versus Normal Roots -- 4  
Conclusion and Way Forward -- References -- Chapter 3: Pretreatment  
of Wheat Straw Using Ionic Liquids for Bioethanol Production: A Review  
-- 1 Introduction -- 2 Availability of Wheat Straw.  
2.1 Potential and Properties of Wheat Straw as a Precursor for  
Bioethanol Production -- 2.2 Pretreatment of Wheat Straw -- 3 Impacts  
of Wheat Straw Pretreatment Using Ionic Liquids on a Sustainable and  
Cleaner Environment -- 4 Ionic Liquids (ILs) -- 4.1 General Types of  
Ionic Liquids -- 4.1.1 Protic Ionic Liquids (PILs) -- 4.1.2 Aprotic Ionic  
Liquids -- 4.2 Different Types of ILs for Pretreatment of Wheat Straw --  
4.2.1 1-Allyl-3-Methylimidazolium Chloride -- 4.2.2 1-Ethyl-3-  
Methylimidazolium Acetate (Emim-CH<sub>3</sub>COO) -- 4.2.3 1-Butyl-3-  
Methylimidazolium Hydrogen Sulfate (Bmim-HSO<sub>4</sub>) -- 4.2.4 1-Butyl-3-  
Methylimidazolium Thiocyanate (Bmim-SCN) -- 4.2.5 1-Ethyl-3-  
Methylimidazolium Diethyl Phosphate (EMIM-DEP) -- 4.2.6 1-Methyl-  
3-(4-Sulfobutyl)Imidazolium Bisulfate (HSO<sub>3</sub>-BMIM-HSO<sub>4</sub>) -- 4.2.7  
Cholinium Taurate (Ch-Tau) ILs -- 5 Conclusion -- References --  
Chapter 4: Harnessing the Sustainable Bioresource, Cellulose at the  
Nanoscale for Multifarious Environmental Applications -- 1  
Introduction -- 2 ABCs of Cellulose and Nanocellulose -- 3 Extraction  
of NC -- 4 Surface Modification -- 5 Spectrum of Neoteric NC-Based  
Materials and Exploratory Endeavors for Environmental Applications --  
6 Challenges, Future-Direction of Research, and Concluding Remarks  
-- References -- Chapter 5: Allelochemicals as Natural Herbicides for  
Sustainable Agriculture to Promote a Cleaner Environment -- 1  
Introduction -- 2 Allopathic Interactions and Allelopathic Compounds  
-- 2.1 Biosynthetic Pathways of Allelochemicals -- 2.2 Release of  
Allelochemicals -- 2.3 Factors Affecting the Production and Release of  
Allelochemicals -- 2.3.1 Genetic Factors -- 2.3.2 Environmental Factors  
-- 3 Mechanism of Allelochemical Action -- 4 Strategies for the Use of  
Allelochemicals as a Bioherbicide -- 4.1 Plant Allelopathins as a Source  
of Bioherbicides.  
4.2 Allelopathic Crops in Weed Suppression through Intercropping and  
Crop Rotation Methods -- 4.2.1 Intercropping -- 4.2.2 Cover Crops --  
4.3 Plant Breeding and Biotechnology for Bioherbicide Development --  
4.3.1 Germplasm Screening for Allelopathic Cultivars -- 4.3.2  
Molecular Breeding for Improving Allelopathic Traits -- 4.3.3 Genetic  
Engineering Approaches for Improving Allelopathic Traits -- 5  
Conclusion -- References -- Chapter 6: Strategies and Limitations of  
Water Treatment Methods for Point-of-Use Application -- 1  
Introduction -- 2 Chemical Disinfectants -- 2.1 Chlorination -- 2.2  
Iodine -- 2.3 Silver -- 2.4 Potassium Permanganate, Ferrates, and  
Ozone -- 2.5 Coagulation -- 3 Physical Disinfectants -- 3.1 Ultraviolet  
Radiation -- 3.2 Solar Disinfection -- 3.3 Filtration Methods -- 3.3.1  
Membrane-Based Techniques -- 3.3.2 Sand Filtration -- 3.3.3 Rapid  
Sand Filtration -- 3.3.4 Granular Activated Carbon -- 4 Future  
Perspectives on Water Disinfection -- References -- Part II: Cleaner  
Technologies on Mitigation of Organic and Inorganic Pollutants --  
Chapter 7: Recent Trends in Application of Bacterial Polymers to  
Mitigate Organic and Inorganic Pollutants -- 1 Introduction -- 2  
Environmental Application of Microbial Biopolymers -- 2.1 Oil Recovery  
-- 2.2 Heavy Metal Removal and Sorption -- 2.3 Dye Removal from

Wastewater -- 2.4 Raw and Drinking Water Treatment -- 2.5  
Wastewater Flocculation and Setting -- 2.6 Dewatering from Sludge --  
2.7 Removal of Toxic Organic Compounds -- 2.8 Landfill Leachate  
Treatment -- 2.9 Soil Remediation and Reclamation -- 2.10 Challenges  
and Prospects -- References -- Chapter 8: Bioremediation: Efficient  
Technology to Combat Pesticide Pollutants in Environment -- 1  
Introduction -- 2 Different Sources of Pesticide Contamination -- 3  
Bioremediation of Pesticide -- 3.1 Chemistry Behind Pesticide  
Degradation.  
4 Microbial Diversity Involved in Degradation of Pesticides -- 4.1  
Bacterial Degradation of Pesticides -- 4.2 Fungal Degradation of  
Pesticides -- 4.3 Enzymes Involved in Pesticide Degradation -- 5  
Bioremediation Strategies and Its Application -- 5.1 In Situ Techniques  
-- 5.1.1 Bioventing -- 5.1.2 Bioaugmentation -- 5.1.3 Biopiles -- 5.1.4  
Biosparging -- 5.1.5 Biostimulation -- 5.1.6 Natural Attenuation -- 5.2  
Ex Situ Techniques -- 5.2.1 Composting -- 5.2.2 Land Farming --  
5.2.3 Bioreactors -- 6 Approaches for Enhancing the Bioremediation of  
Pesticides -- 6.1 Bioaugmentation -- 6.2 Biostimulation -- 6.3 Cell  
Immobilization -- 7 Technological Advancement in Bioremediation of  
Pesticides -- 7.1 Genetic Engineering for Biodegradation of Pesticides  
-- 7.2 Metagenomics Approaches for Biodegradation of Pesticides --  
7.3 Genomics and Proteomics Role in Biodegradation of Pesticides --  
7.4 Nanotechnological Approaches for Biodegradation of Pesticides --  
8 Conclusions and Future Prospects -- References -- Chapter 9:  
Removal of Dyes From Industrial Effluents Using Bioremediation  
Technique -- 1 Introduction -- 2 Bioremediation -- 3 Microorganisms  
Used in Bioremediation -- 3.1 Bacteria -- 3.2 Fungi -- 3.3 Algae -- 4  
Types of Bioremediation -- 4.1 Biosorption -- 4.2 Bioaccumulation --  
4.3 Biosorption and Bioaccumulation -- 4.4 Bio-oxidation/Bioreduction  
-- 4.5 Bioleaching -- 4.6 Bioaugmentation -- 4.7 Biostimulation -- 5  
Issues Related to Bioremediation -- 6 Conclusions -- References --  
Chapter 10: A Harmless Approach on Textile Effluent Detoxification:  
Bioremediation and Recent Strategies -- 1 Introduction -- 2 Wet  
Processing in Textile Industry and Effluents -- 2.1 Pretreatment Process  
-- 2.2 Coloration Process -- 2.3 Finishing Process -- 3 Wastewater  
Treatment in Textile Processing -- 3.1 Physical Treatment Methods --  
3.2 Chemical Treatment Methods.  
3.3 Biological Methods for Textile Effluent Treatment -- 3.3.1 Microbial  
Treatments for Bioremediation -- Yeast Culture -- Bacterial Culture --  
Fungal Cultures -- Microalgae -- Aerobic Biodegradation -- Anaerobic  
Biodegradation -- 3.3.2 Agricultural Residues for Color Removal --  
3.3.3 Chitin and Chitosan -- 3.4 Integrated Approaches with  
Biotechnological Interventions -- 3.4.1 Cell Factories and Whole-Cell  
Biocatalysts (WCBs) -- 3.4.2 Microbial Fuel Cell Technology -- 3.4.3  
Nanotechnological Applications -- 3.5 Appropriation of Best Practices  
-- 3.5.1 Eco-Friendly Alternatives to Conventional Manufacturing --  
3.5.2 Substituted Textile Process Products -- 3.5.3 Less Polluting  
Substances -- 4 Conclusions and Perspectives -- References --  
Chapter 11: Modern Bioremediation Approaches for Clean and Green  
Environment -- 1 Introduction -- 1.1 Types of Bioremediation -- 1.2  
Role of Bioremediation in Remediating Environmental Pollutants -- 2  
Modern Approaches in Bioremediation -- 2.1 Electrokinetic  
Bioremediation -- 2.2 Nanobioremediation -- 2.3 Microbial Fuel Cells  
-- 2.4 Metagenomics and Their Role in Bioremediation -- 3 Conclusion  
-- References -- Chapter 12: Arsenic-Transforming Bacteria: A  
Potential Weapon for Arsenic-Contaminated Soil -- 1 Introduction -- 2  
Arsenic Concentration in Aquatic Environment -- 3 Arsenic  
Contamination and Its Effects on Human Well-Being -- 4 Arsenic

Translocation From Soil to Plant -- 5 Arsenic Toxicity: Effects on Plant  
Metabolism -- 6 Arsenic Effect on DNA Structure Modifications -- 6.1  
Mitigation of Arsenic Accumulation in Rice -- 7 Bioremediation -- 7.1  
Phytoremediation -- 7.2 Plant Growth-Promoting Bacteria -- 7.3  
Arsenic-Transforming Bacteria and Its Diversity with Genes Related to  
Arsenic and Enzymes Resulting From Arsenic-Contamina... -- 7.4  
Arsenic-Transforming Bacteria -- 8 Conclusion -- References.  
Chapter 13: Phycoremediation of Heavy Metals, Factors Involved and  
Mechanisms Related to Functional Groups in the Algae Cell S...
