

1. Record Nr.	UNINA9910483210903321
Titolo	Unifying Theories of Programming : 6th International Symposium, UTP 2016, Reykjavik, Iceland, June 4-5, 2016, Revised Selected Papers // edited by Jonathan P. Bowen, Huibiao Zhu
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
ISBN	3-319-52228-0
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (IX, 217 p. 36 illus.)
Collana	Theoretical Computer Science and General Issues, , 2512-2029 ; ; 10134
Disciplina	005.1
Soggetti	Computer science Compilers (Computer programs) Software engineering Machine theory Computer Science Logic and Foundations of Programming Compilers and Interpreters Software Engineering Formal Languages and Automata Theory Theory of Computation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Abstraction refinement -- Choice -- Termination -- Feasibility -- Locality.-Concurrency -- Communication. .
Sommario/riassunto	This book constitutes the refereed proceedings of the 6th International Symposium on Unifying Theories of Programming, UTP 2016, held in Reykjavik, Iceland, in June 2016, in conjunction with the 12th International Conference on Integrated Formal Methods, iFM 2016. The 8 revised full papers presented were carefully reviewed and selected from 10 submissions. They deal with the fundamental problem of combination of formal notations and theories of programming that define in various different ways many common notions, such as abstraction refinement, choice, termination, feasibility, locality, concurrency, and communication. They also show that despite many

differences, such theories may be unified in a way that greatly facilitates their study and comparison. .
