Sommario/riassunto	In Belonging: Rethinking Inclusive Practices to Support Well-Being and Identity , issues related to inclusive education and belonging across a range of education contexts from early childhood to tertiary education are examined and matters related to participation, policy and theory, and identity and well-being are explored. Individual chapters, which are drawn from papers presented at The Inclusive Education Summit held at the University of Canterbury, 2016, canvass a variety of topics

including pedagogy, sexuality, theory, policy and practice. These topics are explored from the authors' varying perspectives as practitioners, academics and lay-persons and also from varying international perspectives including New Zealand, South Africa and Australia. Contributors are: Keith Ballard, Henrietta Bollinger, Hera Cook, Michael Gaffney, Annie Guerin, Fiona Henderson, Leechin Heng, Kate McAnelly, Trish McMenamin, Be Pannell, Christine Rietveld, Marie Turner, Ben Whitburn, Julie White, and Melanie Wong.

Sommario/riassunto

This book is dedicated to Victor Emmanuilovich Katsnelson on the occasion of his 75th birthday and celebrates his broad mathematical interests and contributions. Victor Emmanuilovich's mathematical career has been based mainly at the Kharkov University and the Weizmann Institute. However, it also included a one-year guest professorship at Leipzig University in 1991, which led to him establishing close research contacts with the Schur analysis group in Leipzig, a collaboration that still continues today. Reflecting these three periods in Victor Emmanuilovich's career, present and former colleagues have contributed to this book with research inspired by him and presentations on their joint work. Contributions include papers in function theory (Favorov-Golinskii, Friedland-Goldman-Yomdin, Kheifets-Yuditskii), Schur analysis, moment problems and related topics (Boiko-Dubovoy, Dyukarev, Fritzsche-Kirstein-Mäder), extension of linear operators and linear relations (Dijksma-Langer, Hassi-de Snoo, Hassi -Wietsma) and non-commutative analysis (Ball-Bolotnikov, Cho-Jorgensen).
