Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Les grimpeurs professionnels sont présentés comme des individus talentueux qui voyagent dans le monde entier pour escalader les voies et les blocs les plus difficiles. Guillaume Dumont montre comment ils essayent de vivre de leur travail en devenant des « ambassadeurs de marque » pour des entreprises. L'auteur les suit sur les sites d'escalade jusqu'au sommet des blocs, dans leurs rencontres avec les sponsors mais aussi dans leur vie de tous les jours. Son enquête décrit un professionnalisme aux contours flous, qui impose en réalité une multitude de tâches, pas toujours rémunérées, relevant de la marchandisation de soi. Ce faisant, il révèle les similitudes avec le travail créateur, tel qu'il est étudié dans d'autres secteurs. Il contribue ainsi aux savoirs sur les transformations du monde du travail indépendant qui touchent aujourd'hui de nombreux professionnels.

Sommario/riassunto	This book offers an ecological foundation for social work and for care provision in general. It presents the ecosocial approach according to its

origins, distinguishing it from other theoretical social work approaches and applying it to various areas of care for welfare. The ecological anchoring of social welfare and common care is an emerging topic in political, organisational, and person-related development of human services and social work. In an era of crisis, this anchoring is an essential contribution to the study of sustainable social provision. The book embeds the dispositions about it in the ecology of the protection and securing of common life. *Ecology of Common Care: The Ecosocial Approach as a Theory of Social Work and Human Service* is an essential text that should engage the academic community of educators and researchers in social work and other human services professions, as well as students in bachelor's and master's programmes in these professions.
