Sommario/riassunto

Written by an experienced author and expert in the field, Wars of the French Revolution and Napoleon, 1792-1815 provides a thorough re-examination of the crucial period in the history of France for students of history and military studies. Based on extensive research, and including twenty detailed maps, this study is unique in its focus on the wars of both the French Revolution and Napoleon. Owen Connolly expertly analyzes them both to provide a broader context for warfare. Examining the causes of the wars, and how the practices of warfare during this period were to inf

Sommario/riassunto

We are very pleased to present this LNCS volume, the proceedings of the 9th International Conference on Parallel Problem Solving from Nature (PPSN IX). PPSN is one of the most respected and highly regarded conference series in evolutionary computation and natural computing / computation. This

biennial event was first held in Dortmund in 1990, and then in Brussels (1992), Jerusalem (1994), Berlin (1996), Amsterdam (1998), Paris (2000), Granada (2002), and Birmingham(2004).

PPSN continues to be the conference of choice by researchers all over the world, who value its high quality. We received 255 paper submissions this year. After an extensive peer review process involving more than 1000 reviews, the programme committee selected the top 106 papers for inclusion in this volume and, of course, for presentation at the conference. This represents an acceptance rate of 42%. The papers included in this volume cover a wide range of topics, from evolutionary computation to swarm intelligence and from bio-inspired computing to real-world applications. They represent some of the latest and best research in evolutionary and natural computation. Following the PPSN tradition, all papers at PPSN IX were presented as posters. There were 7 sessions: each session consisting of around 15 papers. For each session, we covered as wide a range of topics as possible so that participants with different interests could find some relevant papers in every session.
