	Sommario/riassunto	"In 2011 the Grand Challenges in Global Mental Health initiative identified priorities that have the potential to make a significant impact on the lives of people with mental, neurological, and substance use disorders. Reduction of the cost and improvement of the supply of effective medicines was highlighted as one of the top five challenges. For low- and middle-income countries, improving access to appropriate essential medicines can be a tremendous challenge and a critical barrier to scaling up quality care for mental, neurological, and

substance use disorders. Reduction of cost and improvement of the supply of effective medicines has the potential to significantly impact the lives of patients with these disorders. Improving Access to Essential Medicines for Mental, Neurological, and Substance Use Disorders in Sub-Saharan Africa is the summary of a workshop convened by the Institute of Medicine Neuroscience Forum in January 2014 in Addis Ababa, Ethiopia to discuss opportunities for achieving long-term affordable access to medicines for these disorders. This report examines challenges and opportunities for improving access to essential medicines in four critical areas: demand, selection, supply chains, and financing and pricing. The report also discusses successful activities that increase access to essential medicines both within Sub-Saharan Africa and in other developing countries, and considers the role of governments, nongovernmental organizations, and private groups in procurement of essential medicines for mental, neurological, and substance use disorders."--

ISBN	3-319-24072-2
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (XVI, 264 p. 107 illus. in color.)
Collana	Programming and Software Engineering, , 2945-9168 ; ; 9306
Disciplina	004.6
Soggetti	Software engineering
	Information storage and retrieval systems
	Data protection
	Electronic data processing - Management
	Database management
	Business information services
	Software Engineering
	Information Storage and Retrieval
	Data and Information Security
	IT Operations
	Database Management
	IT in Business

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Sommario/riassunto	Infotext: This book constitutes the refereed proceedings of the 4th European Conference on Service-Oriented and Cloud computing, ESOCC 2015, held in Taormina, Sicily, Italy, in September 2015. The 13 research papers, three industry papers, and two work-in-progress papers presented were carefully reviewed and selected from 48 submissions. The papers are organized in topical sections on cloud technology, service composition, software development and cloud technology, cloud computing, and industry track.
