

1. Record Nr.	UNINA9910483346303321
Autore	Choi Pak-Sing
Titolo	Auction theory : introductory exercises with answer keys // Pak-Sing Choi, Felix Munoz-Garcia
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-69575-1
Descrizione fisica	1 online resource (304 pages)
Collana	Springer Texts in Business and Economics
Disciplina	381.17
Soggetti	Auctions Auction theory
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Organization of the Book -- How to Use This Book -- Acknowledgments -- Contents -- 1 Second-Price Auctions -- Introduction -- Exercise #1.1: Second-Price Auction with Complete InformationA -- Exercise #1.2: Second-Price Auctions Under Incomplete InformationB -- Exercise #1.3: Second-Price Auctions Under Incomplete Information and Discrete ValuationsB -- Exercise #1.4: Robustness of Equilibrium Bidding in the Second-Price AuctionA -- Exercise #1.5: Efficiency in Second-Price AuctionsA -- Exercise #1.6: Bidding Behavior in the English AuctionA -- Exercise #1.7: Expected Revenue in the Second-Price AuctionC -- Exercise #1.8: Second-Price Auctions with Reservation PricesA -- Exercise #1.9: Second-Price Auctions with Entry FeesB -- Exercise #1.10: Asymmetric Bidding Equilibria in the Second-Price AuctionB -- Exercise #1.11: Collusion in Second-Price Auctions, Based on GrahamandMarshall1987A -- Exercise #1.12: Second-Price Auctions with Budget Constrained Bidders, Based on CheandGale1998B -- 2 First-Price Auctions -- Introduction -- Exercise #2.1: First-Price Auction Under Complete InformationA -- Exercise #2.2: First-Price Auction with Only Two Bidders and Uniformly Distributed ValuationsA -- Exercise #2.3: First-Price Auction with N2 Bidders and Uniformly Distributed ValuationsA -- Exercise #2.4: First-Price Auction with Generic Distribution of Valuations-The Direct ApproachB -- Exercise #2.5: First-Price Auction with Uniformly or

Exponentially Distributed ValuesB -- Exercise #2.6: First-Price Auction with Generic Distribution of Valuations-The Envelope Theorem ApproachC -- Exercise #2.7: Efficiency in First-Price AuctionsA -- Exercise #2.8: The First-Order StatisticB -- Exercise #2.9: The Second-Order StatisticB -- Exercise #2.10: The kth-Order StatisticC -- Exercise #2.11: Bidding Behavior in the Dutch AuctionA.

3 First-Price Auctions: Extensions -- Introduction -- Exercise #3.1: Expected Revenue in the First-Price Auction-Direct ProofB -- Exercise #3.2: Expected Revenue in the First-Price Auction-Proof Using the First-Order StatisticC -- Exercise #3.3: Expected Payment in the First-Price AuctionB -- Exercise #3.4: First-Price Auction with Risk-Averse Bidders-An IntroductionA -- Exercise #3.5: First-Price Auction with Risk-Averse Bidders-General SettingB -- Exercise #3.6: Efficiency with Risk AversionA -- Exercise #3.7: First-Price Auction with Asymmetrically Distributed ValuationsB -- Exercise #3.8: Sequential Version of the First-Price AuctionA -- Exercise #3.9: First-Price Auctions with Reservation Prices-One BidderA -- Exercise #3.10: First-Price Auctions with Reservation Prices-Several BiddersC -- Exercise #3.11: First-Price Auction with Entry FeesC -- Exercise #3.12: First-Price Auction with Discrete ValuationsB -- Exercise #3.13: Collusion in First-Price Auctions, Based on McAfeeandMcMillan1992B -- Exercise #3.14: First-Price Auctions with Budget Constrained Bidders, Based on CheandGale1998B -- 4 All-Pay Auctions and Auctions with Asymmetrically Informed Bidders -- Introduction -- Exercise #4.1: All-Pay Auction Under Complete Information, Based on Bayeetal1996B -- Exercise #4.2: Testing a Bidding Function in a First-Price, All-Pay AuctionA -- Exercise #4.3: Finding the Equilibrium Bidding Function in the First-Price All-Pay Auction Using the Envelope Theorem ApproachC -- Exercise #4.4: Finding the Equilibrium Bidding Function in the First-Price All-Pay Auction Using the Direct ApproachB -- Exercise #4.5: Efficiency in All-Pay AuctionsA -- Exercise #4.6: Finding the Expected Revenue in the First-Price All-Pay AuctionB -- Exercise #4.7: Finding Equilibrium Bids in the Second-Price All-Pay AuctionB -- Exercise #4.8: War of AttritionA.

Exercise #4.9: Asymmetrically Informed Risk-Neutral Bidders, Based on KimandChe2014B -- Exercise #4.10: Asymmetrically Informed Risk-Averse Bidders, Based on OrozcoAlemanandMunozGarcia2011B -- 5 Third-Price Auctions, kth-Price Auctions, and Lotteries -- Introduction -- Exercise #5.1: Third-Price Auction, A Numerical ExampleA -- Exercise #5.2: Finding the Equilibrium Bidding Function in a Third-Price AuctionC -- Exercise #5.3: Equilibrium Bidding Function in a Third-Price Auction with Uniformly or Exponentially Distributed ValuesB -- Exercise #5.4: kth-Price AuctionC -- Exercise #5.5: Efficiency in kth-Price AuctionsA -- Exercise #5.6: Lottery Auction, An IntroductionA -- Exercise #5.7: Lottery Auction, A More General ApproachB -- Exercise #5.8: Efficiency in Lottery AuctionsA -- 6 The Revenue Equivalence Principle -- Introduction -- Exercise #6.1: Revenue Comparison in Four Auction FormatsA -- Exercise #6.2: Revenue Comparison Between First- and Second-Price AuctionsB -- Exercise #6.3: The Revenue Equivalence Principle with Risk Averse BiddersA -- Exercise #6.4: The Revenue Equivalence Principle with Risk Averse SellersB -- Exercise #6.5: Revenue Equivalence Theorem-Short ProofB -- Exercise #6.6: Revenue Equivalence Theorem-Longer ProofC -- 7 Common-Value Auctions -- Introduction -- Exercise #7.1: The Winner's Curse in Common-Value Auctions-IntroductionA -- Exercise #7.2: Equilibrium Bidding in Common-Value Auctions with Two BiddersB -- Exercise #7.3: Equilibrium Bidding in Common-Value Auctions with N_2 BiddersC -- Exercise #7.4: First-Price Auction When Bidders Have Interdependent

ValuesB -- Exercise #7.5: Second-Price Auction When Bidders have Interdependent ValuesB -- Exercise #7.6: Revenue Comparison in Auctions When Bidders Have Interdependent ValuesB -- 8 Multi-Unit Auctions -- Introduction.
Exercise #8.1: First-Price Auction Selling Multiple Units (Discriminatory Auction)A -- Exercise #8.2: Second-Price Auction Selling Multiple Units (Uniform-Price Auction)A -- Exercise #8.3: Second-Price Auction Selling Multiple Units, Allowing for Different PricesB -- Exercise #8.4: Divide Bidders and Conquer in a First-Price AuctionB -- Exercise #8.5: Divide Bidders and Conquer in a Second-Price AuctionA -- 9 Mechanism Design -- Introduction -- Exercise #9.1: Incentives to Truthfully Reveal ValuationsA -- Exercise #9.2: First-Price Auction as a Direct Revelation MechanismB -- Exercise #9.3: Second-Price Auction as a Direct Revelation Mechanism A -- Exercise #9.4: VCG Mechanism Selling a Single UnitB -- Exercise #9.5: VCG Mechanism Selling Several UnitsB -- Exercise #9.6: VCG Mechanism and the Generalized Second-Price AuctionB -- 10 Procurement Auctions -- Introduction -- Exercise #10.1: Procurement Auctions Under Complete InformationA -- Exercise #10.2: Procurement Auctions Under Incomplete InformationB -- Exercise #10.3: Procurement Auctions with External Effects, Based on Choietal2018 C -- Exercise #10.4: Procurement Auctions with Perfect MonitoringB -- Exercise #10.5: Procurement Auctions with Imperfect MonitoringC -- A Game Theory Appendix -- Background -- Dominated Strategies -- Nash Equilibrium -- Mixed-Strategy Nash Equilibrium -- Subgame Perfect Equilibrium -- Bayesian Nash Equilibrium -- References -- Index.
