

1. Record Nr.	UNINA9910483351303321
Titolo	Medical Image Computing and Computer Assisted Intervention MICCAI 2017 : 20th International Conference, Quebec City, QC, Canada, September 11-13, 2017, Proceedings, Part I // edited by Maxime Descoteaux, Lena Maier-Hein, Alfred Franz, Pierre Jannin, D. Louis Collins, Simon Duchesne
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
ISBN	3-319-66182-5
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (XLVI, 811 p. 343 illus.)
Collana	Image Processing, Computer Vision, Pattern Recognition, and Graphics ; ; 10433
Disciplina	616.0757
Soggetti	Optical data processing Artificial intelligence Mathematical statistics Pattern recognition Health informatics Image Processing and Computer Vision Artificial Intelligence Probability and Statistics in Computer Science Pattern Recognition Health Informatics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	The three-volume set LNCS 10433, 10434, and 10435 constitutes the refereed proceedings of the 20th International Conference on Medical Image Computing and Computer-Assisted Intervention, MICCAI 2017, held in Quebec City, Canada, in September 2017. The 255 revised full papers presented were carefully reviewed and selected from 800 submissions in a two-phase review process. The papers have been organized in the following topical sections: Part I: atlas and surface- based techniques; shape and patch-based techniques; registration

techniques, functional imaging, connectivity, and brain parcellation; diffusion magnetic resonance imaging (dMRI) and tensor/fiber processing; and image segmentation and modelling. Part II: optical imaging; airway and vessel analysis; motion and cardiac analysis; tumor processing; planning and simulation for medical interventions; interventional imaging and navigation; and medical image computing. Part III: feature extraction and classification techniques; and machine learning in medical image computing.
