Sommario/riassunto

This book constitutes the refereed proceedings of the 21th IFIP WG 6.1
International Conference on Testing Communicating Systems,
TESTCOM 2009, and the 9th International Workshop on Formal
Approaches to Testing of Software, FATES 2009, jointly held in
Eindhoven, The Netherlands, in November 2009. The 13 revised full
papers presented together with 6 short papers were carefully selected
from 37 submissions to both events. The papers cover new
approaches, concepts, theories, methodologies, tools, and experiences
in the field of testing of communicating systems and general software.
