

1. Record Nr.	UNINA9910483398503321
Titolo	Death-feigning in insects : mechanism and function of tonic immobility // Masaki Sakai, editor
Pubbl/distr/stampa	Singapore : , : Springer, , [2021] ©2021
ISBN	981-336-598-6
Descrizione fisica	1 online resource (185 pages)
Collana	Entomology Monographs
Disciplina	595.7051
Soggetti	Insects - Behavior Insects - Physiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Contents -- Chapter 1: Freezing and Tonic Immobility: Their Definitions and Naming -- 1.1 Introduction -- 1.2 Freezing and TI -- 1.2.1 A Rat and a Cat -- 1.2.1.1 Step 1 (Encounter, Fig. 1.1A-1) -- 1.2.1.2 Step 2 (Approach, Fig. 1.1A-2) -- 1.2.1.3 Step 3 (Imminent Attack, Fig. 1.1A-3) -- 1.2.1.4 Step 4 (Attack, Fig. 1.1A-4) -- 1.2.2 A Beetle and a Toad -- 1.2.2.1 Step 1 (Encounter, Fig. 1.1B-1) -- 1.2.2.2 Step 2 (Approach, Fig. 1.1B-2) -- 1.2.2.3 Step 3 (Attack, Fig. 1.1B-3) -- 1.3 Mechanisms of Freezing -- 1.3.1 Vertebrates -- 1.3.2 Insects -- 1.4 Mechanisms of TI -- 1.4.1 Animals -- 1.4.2 Brief History of TI Studies -- 1.4.3 General Features and Neural Mechanisms of TI -- 1.4.3.1 Vertebrates -- 1.4.3.2 Hypotheses of TI Based on Vertebrate Study -- 1.4.3.3 Insects -- 1.5 Naming -- 1.5.1 Freezing -- 1.5.2 TI -- References -- Chapter 2: Historical Review on Thanatosis with Special Reference to the Work of Fritz Steiniger -- 2.1 Introduction -- 2.2 Which Kind of Stimuli Induce or Abolish the Cataleptic State? -- 2.3 Localization of "Center of Cataleptic State" -- 2.4 The Ecological Importance of the Cataleptic State -- 2.5 Evolutionary Considerations -- 2.6 Definitions of Various Animal Immobilities by Steiniger -- 2.7 Conditions for Inducing Immobility in an Animal -- 2.8 Problems with the Term "Animal Hypnosis" -- References -- Chapter 3: The Function of Tonic Immobility: Review and Prospectus -- 3.1 Introduction -- 3.2 Problems in the Study of the Function of TI -- 3.2.1

Confusion with Similar Concepts -- 3.2.2 Misunderstandings  
Due to the Meanings Contained in the Terms -- 3.3 Case Studies  
of the Function of TI -- 3.3.1 Specialized TI Posture for Gape-Limited  
Predators -- 3.3.1.1 Defensive Mechanism of TI -- 3.3.1.2  
Effectiveness of the Defense -- 3.3.1.3 Predator Specificity of TI  
Defense -- 3.3.1.4 Generality of Function.  
3.3.2 Instantaneous Switching of Defensive Coloration -- 3.3.3  
Proactive Dropping and TI as a "Side Effect" -- 3.3.4 Other Studies on TI  
Functions -- 3.4 Future Perspective -- References -- Chapter 4:  
Environmental, Physiological, and Genetic Effects on Tonic Immobility  
in Beetles -- 4.1 Introduction -- 4.2 General Feature of Tonic  
Immobility in the Beetles Used -- 4.3 Taxonomic Distribution -- 4.4  
Phenotypic Plasticity: Two Modes in Insects -- 4.4.1 Pre-Stimulus  
Behaviors -- 4.4.2 Circadian Rhythm -- 4.4.3 Mating -- 4.4.4  
Starvation -- 4.4.5 Ambient Temperature -- 4.4.6 Body Size -- 4.4.7  
Age -- 4.4.8 Season -- 4.4.9 Conclusion -- 4.5 Artificial Selection  
for Duration of Tonic Immobility and the Correlated Responses -- 4.5.1  
Model Study 1: *Tribolium* Species -- 4.5.1.1 Direct Responses --  
4.5.1.2 Correlated Response I: Cost of Tonic Immobility -- 4.5.1.3  
Correlated Response II: Activity -- 4.5.1.4 Correlated Response III:  
Dopamine and Biogenic Amines -- 4.5.1.5 Transcriptomic Comparison  
-- 4.5.1.6 Arousal from Tonic Immobility -- 4.5.2 Model Study 2:  
*Callosobruchus chinensis* -- 4.6 Future Perspective -- References --  
Chapter 5: Ultrasound-Induced Freezing Response in Moths -- 5.1  
Introduction -- 5.2 Hidden Ultrasonic Communication -- 5.3 Calling  
Ultrasound -- 5.3.1 Mating System with Calling Songs -- 5.3.1.1  
Noctuoidea -- 5.3.1.2 Pyraloidea -- 5.3.2 Evolution of Calling Songs --  
5.4 Courtship Ultrasound -- 5.4.1 Loud Courtship Songs -- 5.4.2 Soft  
Courtship Songs -- 5.5 Secondary Use of Freezing Response -- 5.5.1  
True Love Songs -- 5.5.2 Deceptive Love Songs -- 5.5.3 Evolutionary  
Origin of Courtship Songs -- References -- Chapter 6: Vibration-  
Induced Immobility in Coleopteran Insects -- 6.1 Introduction -- 6.1.1  
Vibration-Induced Immobility -- 6.1.2 Vibration-Induced Immobility  
and Communication -- 6.2 TI and Freeze Responses in Coleoptera.  
6.2.1 Survey of TI and Freeze Responses -- 6.2.2 TI and Other Behavior  
in Coleopteran Adults -- 6.2.3 TI and Freeze Responses in Coleopteran  
Larvae -- 6.3 Vibration Sense Organs -- 6.3.1 Chordotonal Organs --  
6.3.2 Mechanosensilla and Chordotonal Organs -- 6.4 Freeze  
Responses and TI in Cerambycidae -- 6.5 TI in Nitidulidae -- 6.6  
Freeze Responses in Scarabaeidae -- 6.6.1 Pupal Vibratory Signals  
and Larval Freeze Responses -- 6.6.2 Evolution of Freeze Responses --  
References -- Chapter 7: Tonic Immobility in a Cricket: Behavioral  
Characteristics, Neural Substrate, and Functional Significance -- 7.1  
Introduction -- 7.2 Time Course of TI -- 7.3 Strong TI and Weak TI --  
7.4 Responsiveness to Sensory Stimuli During TI -- 7.5 Emergence  
of Catalepsy -- 7.6 Survey of Sense Organs Involved in Induction of TI  
-- 7.7 Contribution of the Central Nervous System to TI -- 7.8 TI that  
Occurs in Natural Settings -- 7.9 Differences in TIs and Escape  
Reactions in Related Species -- 7.10 Summary -- References --  
YouTube -- Chapter 8: Tonic Immobility in a Cricket: Neuronal  
Underpinnings of Global Motor Inhibition -- 8.1 Introduction -- 8.2  
Neuroanatomy of Flexor and Extensor Tibiae Muscles -- 8.3 Isometric  
Muscular Contraction Characterizes the Induction of TI -- 8.4  
Neuroanatomy of the Femoral Chordotonal Organ -- 8.5 Femoral  
Chordotonal Organ Measures Muscular Isometric Contraction -- 8.6  
Inhibitory Functions of the FCO in Motor Control -- 8.6.1 Resistance  
Reflex and Its Inhibition -- 8.6.2 Suppression of Leg Movements -- 8.7  
Motor Neuronal Activity Characterizing TI -- 8.8 Neuronal

Underpinnings Underlying the Induction and Maintenance of TI -- 8.8.1 Sensory Aspect -- 8.8.2 Central Nervous System -- 8.8.3 Motor Aspect -- 8.9 Evolutional Perspective -- References -- YouTube -- Chapter 9: Catalepsy and Twig Mimesis in Insects and Its Neural Control -- 9.1 Introduction. 9.2 Thanatosis and Catalepsy in the Stick Insect -- 9.3 Neural Basis of Catalepsy in the Stick Insect -- 9.3.1 Anatomy of Sense Organs and Muscles Controlling the Femur-Tibia Joint -- 9.3.2 Catalepsy in the Femur-Tibia Control Loop and Its Neural Basis -- 9.4 General Summary -- References -- Chapter 10: Descending Neuron for Freezing Behavior in *Drosophila melanogaster* -- 10.1 Tonic Immobility and Freezing -- 10.2 Defensive Behavior and Candidate Command for Freezing in Crayfish -- 10.3 Defensive Behavior to Looming Object in Flies -- 10.4 DNp09: Descending Neuron for Freezing -- 10.5 Optic Glomeruli -- 10.6 Axonal Projection of Freezing Descending Neuron -- 10.7 Neuromodulation of the Startle Responses -- 10.8 Similarity Between Freezing in Flies and Fears in Mammals -- 10.9 Future Work -- References -- Chapter 11: Immobility Behaviors in Fish: A Comparison with Other Vertebrates -- 11.1 Introduction -- 11.2 Orienting Immobility -- 11.2.1 General Orienting Response in Vertebrates -- 11.2.2 Orienting Response in Fish -- 11.3 Freezing Immobility -- 11.3.1 General Features of Freezing in Vertebrates -- 11.3.2 Freezing in Fish -- 11.4 Tonic Immobility -- 11.4.1 General Features of TI in Vertebrates -- 11.4.2 TI in Fish -- 11.4.2.1 Elasmobranchs -- 11.4.2.2 Teleosts -- 11.4.2.3 Death and Illness Feigning in Fish as a Hunting Tactic -- 11.5 Significance of Immobility Behaviors in Fish -- References -- Index.
