

1. Record Nr.	UNINA9910483411303321
Titolo	Diagnosis and management of gluten-associated disorders : a clinical casebook // Guy A. Weiss, editor
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-56722-2
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (XVI, 225 p. 32 illus., 27 illus. in color.)
Disciplina	616.34
Soggetti	Celiac disease Diet therapy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	From Classical to Non-Classical Celiac Disease -- Dermatitis Herpetiformis -- Celiac Disease and the Liver -- Pediatric Celiac Disease -- Celiac Disease and Women's Health -- Gluten Challenge in Gluten-Associated Disorders -- Seronegative Celiac Disease -- Non-Responsive Celiac Disease -- Type I Refractory Celiac Disease -- Type II Refractory Celiac Disease -- Enteropathy-associated T-cell Lymphoma -- Celiac Crisis -- The Role of Capsule Endoscopy in Celiac Disease -- Between Functional Gastrointestinal Disorders and Celiac Disease -- The Dietitian Role in Celiac Disease -- Non-Celiac Gluten Sensitivity -- The Dietitian Role in Non-Celiac Gluten Sensitivity -- Fructan Intolerance.
Sommario/riassunto	This clinical casebook provides a comprehensive yet concise state-of-the-art review of gluten-associated disorders. Presented in a case-based format, the casebook reviews the overall management of celiac disease (from seronegative through classical to refractory disease) as well as non-celiac gluten/wheat sensitivity, with an emphasis on gastrointestinal and extra-intestinal manifestations of these disorders. Specific topics presented in these cases include, for instance, dermatitis herpetiformis, celiac disease and the liver, non-responsive celiac disease, celiac crisis, overlap with functional gastrointestinal disorders, and fructan intolerance. Two chapters written by expert dietitians share their experience in managing celiac disease and gluten/wheat

sensitivity. Written by international experts in the field, *Diagnosis and Management of Gluten-Associated Disorders: A Clinical Casebook* is a valuable resource for both adult and pediatric gastroenterologists, hepatologists, primary care physicians, dermatologists, registered dietitians, trainees, and researchers interested in gluten-associated disorders.
