

1. Record Nr.	UNINA9910483438903321
Titolo	Agent-Oriented Software Engineering XIII : 13th International Workshop, AOSE 2012, Valencia, Spain, June 4, 2012, Revised Selected Papers // edited by Jörg Müller, Massimo Cossentino
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2013
ISBN	3-642-39866-9
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (X, 197 p. 78 illus.)
Collana	Programming and Software Engineering ; ; 7852
Disciplina	006.3
Soggetti	Software engineering Artificial intelligence Computer science Software Engineering Artificial Intelligence Computer Science, general
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Model-Driven Approaches to AOSE -- A Methodological Approach to Model Driven Design of Multiagent Systems -- A Norm-Governed Holonic Multi-agent System Metamodel -- Specification of Trade-Off Strategies for Agents: A Model-Driven Approach -- MDA-Based Approach for Implementing Secure Mobile Agent Systems -- Engineering Pervasive and Ubiquitous Multiagent Systems -- Developing Pervasive Agent-Based Applications: A Comparison of Two Coordination Approaches -- Agent Perception within CIGA: Performance Optimizations and Analysis -- Ambient Intelligence with INGENIAS -- AOSE Methodologies -- Analysing the Suitability of Multiagent Methodologies for e-Health Systems -- How to Extract Fragments from Agent Oriented Design Processes -- Forward Self-combined Method Fragments -- "Engineering" Agent-Based Simulation Models?.
Sommario/riassunto	This book constitutes the thoroughly refereed post-proceedings of the 13th Agent-Oriented Software Engineering (AOSE) workshop, held at

the 11th International Conference on Autonomous Agents and Multiagent Systems, AAMAS 2012, in Valencia, Spain, in June 2012. This volume presents 9 thoroughly revised papers selected from 24 submissions as well as two invited articles by leading researchers in the field. The papers cover a broad range of topics related to software engineering of agent-based systems, with particular attention to the integration of concepts and techniques from multi-agent systems with recent programming languages, platforms, and established software engineering methodologies.
