Autore	Tubaro Paola
Titolo	Against the Hypothesis of the End of Privacy : An Agent-Based Modelling Approach to Social Media // by Paola Tubaro, Antonio A Casilli, Yasaman Sarabi
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2014
ISBN	3-319-02456-6
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (61 p.)
Collana	SpringerBriefs in Digital Spaces, , 2193-5890
Disciplina	302.231
Soggetti	Communication Sociology Computer simulation Industrial management Computer networks Economics - Sociological aspects Media Research Simulation and Modeling Media Management Communication Studies Computer Communication Networks Organizational Studies, Economic Sociology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Part I: Why Privacy is not over yet: Conflicting Attitudes of Users, companies and States -- Part II: Modeling Privacy: Online Social Structures and Data Architectures -- Part III: Discussion and Conclusions.
Sommario/riassunto	Several prominent public voices have advanced the hypothesis that networked communications erode the value of privacy in favor of a transparent connected existence. Especially younger generations are often described as prone to live "open digital lives". This hypothesis has raised considerable controversy, polarizing the reaction of its critics as

well as of its partisans. But how likely is the "end of privacy"? Under which conditions might this scenario come to be? What are the business and policy implications? How to ethically assess risks and opportunities? To shed light on the co-evolution and mutual dependencies of networked structures and individual and collective strategies towards privacy, this book innovatively uses cutting-edge methods in computational social sciences to study the formation and maintenance of online social networks. The findings confound common arguments and clearly indicate that Internet and social media do not necessarily entail the end of privacy. Publicity is not "the new norm": quite to the contrary, the book makes the case that privacy is a resilient social force, resulting from a set of interconnected behaviors of Internet users.
