

1. Record Nr.	UNINA9910483468003321
Titolo	Computational and Analytic Methods in Science and Engineering // edited by Christian Constanda
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Birkhäuser, , 2020
ISBN	3-030-48186-7
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (X, 258 p. 94 illus., 62 illus. in color.)
Disciplina	620.00151
Soggetti	Computer science - Mathematics Numerical analysis Mathematical models Computational Science and Engineering Numerical Analysis Mathematical Modeling and Industrial Mathematics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	New Numerical Results for the Optimization of Neumann Eigenvalues -- Transient Convection-Diffusion-Reaction Problems with Variable Velocity Field by Means of DRBEM with Different Radial Basis Functions -- On a Parametric Representation of the Angular Neutron Flux in the Energy Range from 1 eV to 10MeV -- A Boundary Integral Equation Formulation for Advection–Diffusion–Reaction Problems with Point Sources -- Displacement Boundary Value Problem for a Thin Plate in an Unbounded Domain -- A Dirichlet Spectral Problem in Domains Surrounded by Thin Stiff and Heavy Bands -- Spectral Homogenization Problems in Linear Elasticity with Large Reaction Terms Concentrated in Small Regions of the Boundary -- The Mathematical Modelling of the Motion of Biological Cells in Response to Chemical Signals -- Numerical Calculation of Interior Transmission Eigenvalues with Mixed Boundary Conditions -- An Inequality for Hölder Continuous Functions Generalizing a Result of CarloMiranda -- Two-Phase Three-Component Flow in PorousMedia:Mathematical Modeling of Dispersion-Free Pressure Behavior -- Error Analysis and the Role of Permutation in

Dynamic Iteration Schemes -- Index.

Sommario/riassunto

This contributed volume collects papers presented at a special session of the conference Computational and Mathematical Methods in Science and Engineering (CMMSE) held in Cadiz, Spain from June 30 - July 6, 2019. Covering the applications of integral methods to scientific developments in a variety of fields, ranging from pure analysis to petroleum engineering, the chapters in this volume present new results in both pure and applied mathematics. Written by well-known researchers in their respective disciplines, each chapter shares a common methodology based on a combination of analytic and computational tools. This approach makes the collection a valuable, multidisciplinary reference on how mathematics can be applied to various real-world processes and phenomena. Computational and Analytic Methods in Science and Engineering will be ideal for applied mathematicians, physicists, and research engineers.
