

1. Record Nr.	UNINA9910483531603321
Titolo	Model driven engineering languages and systems : 13th International Conference, MODELS 2010, Oslo, Norway, October 3-8, 2010 : proceedings, part I // Dorina C. Petriu, Nicolas Rouquette, ystein Haugen (eds.)
Pubbl/distr/stampa	New York, : Springer, 2010
ISBN	1-280-38957-5 9786613567499 3-642-16145-6
Edizione	[1st ed.]
Descrizione fisica	1 online resource (XXI, 424 p. 173 illus.)
Collana	Lecture notes in computer science, , 0302-9743 ; ; 6394 LNCS sublibrary. SL 2, Programming and software engineering
Altri autori (Persone)	PetriuDorina C RouquetteNicolas Haugenystein
Disciplina	006.7/4
Soggetti	Model-driven software architecture UML (Computer science)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	keynote 1 -- session 1a. Genericity and generalization -- session 1b. Model migration incremental manipulation -- session 1c. Modeling model transformations -- session 2a. Verifying consistency and conformance -- session 2b. Taming modeling complexity -- session 2c. Modeling user-system interaction -- session 3a. Model-driven quality assurance -- session 3b. Managing variability -- session 3c. Multi-modeling approaches.
Sommario/riassunto	The MODELS series of conferences is the premier venue for the exchange of - novative technical ideas and experiences focusing on a very important new te- nical discipline: model-driven software and systems engineering. The expansion ofthisdisciplineisadirectconsequenceoftheincreasingsigni? canceandsuccess of model-based methods in practice. Numerous e? orts resulted in the invention of concepts, languagesand tools for the de?nition, analysis,transformation, and veri?cationofdomain-speci?

modeling languages and general-purpose modeling language standards, as well as their use for software and systems engineering. MODELS 2010, the 13th edition of the conference series, took place in Oslo, Norway, October 3-8, 2010, along with numerous satellite workshops, symposia and tutorials. The conference was fortunate to have three prominent keynote speakers: Ole Lehrmann Madsen (Aarhus University, Denmark), Edward A. Lee (UC Berkeley, USA) and Pamela Zave (AT&T Laboratories, USA). To provide a broader forum for reporting on scientific progress as well as on experience stemming from practical applications of model-based methods, the 2010 conference accepted submissions in two distinct tracks: Foundations and Applications. The primary objective of the first track is to present new research results dedicated to advancing the state-of-the-art of the discipline, whereas the second aims to provide a realistic and verifiable picture of the current state-- the practice of model-based engineering, so that the broader community could be better informed of the capabilities and successes of this relatively young discipline. This volume contains the final version of the papers accepted for presentation at the conference from both tracks.
