                       Attacks and Deep Learning -- Primitives and Tools for Physical Attacks
                       Resistance -- Side-Channel Countermeasures. .

   Sommario/riassunto This book constitutes revised selected papers from the 11th
                       International Workshop on Constructive Side-Channel Analysis and
                       Secure Design, COSADE 2020, held in Lugano, Switzerland, in April
                       2020. Due to COVID-19, the workshop was held online. The 15 papers
                       presented in this volume were carefully reviewed and selected from 36
                       submissions. The workshop covers subjects from wide ranges such as
                       secure design, side channel attacks and countermeasures, and
                       architectures and protocols.
