1. Record Nr.   UNINA9910483572303321

   Autore   Akram Muhammad

   Titolo   Graphs for the analysis of bipolar fuzzy information / / Muhammad Akram, Musavarah Sarwar and Wieslaw A. Dudek

   Pubbl/distr/stampa   Gateway East, Singapore : , : Springer, , [2021]
                        Â©2021

   ISBN   981-15-8756-6

   Edizione   [1st ed. 2021.]

   Descrizione fisica   1 online resource (XXVIII, 452 p. 241 illus., 2 illus. in color.)

   Collana   Studies in Fuzziness and Soft Computing, , 1434-9922 ; ; 401

   Disciplina   510

   Soggetti   Graph theory
                   Fuzzy mathematics
                   Fuzzy graphs

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Includes index.

   Nota di contenuto   Chapter 1: Bipolar Fuzzy Sets and Bipolar Fuzzy Graphs -- Chapter 2: Distance Measures in Bipolar Fuzzy Graphs -- Chapter 3: Special Types of Bipolar Fuzzy Graphs -- Chapter 4: Bipolar Fuzzy Competition Graphs -- Chapter 5: Bipolar Fuzzy Planar Graphs -- Chapter 6: Domination in Bipolar Fuzzy Graphs -- Chapter 7: Bipolar Fuzzy Circuits -- Chapter 8: Energy in Bipolar Fuzzy Graphs -- Chapter 9: Bipolar Neutrosophic Competition Graphs -- Chapter 10: Bipolar Neutrosophic Graph Structures.

   Sommario/riassunto   This monograph discusses decision making methods under bipolar fuzzy graphical models with the aim of overcoming the lack of mathematical approach towards bipolar information—positive and negative. It investigates the properties of bipolar fuzzy graphs, their distance functions, and concept of their isomorphism. It presents certain notions, including irregular bipolar fuzzy graphs, domination in bipolar fuzzy graphs, bipolar fuzzy circuits, energy in bipolar fuzzy graphs, bipolar single-valued neutrosophic competition graphs, and bipolar neutrosophic graph structures. This book also presents the applications of mentioned concepts to real-world problems in areas of product manufacturing, international relations, psychology, global terrorism and more, making it valuable for researchers, computer

scientists, social scientists and alike.
