Autore	O'Hare William P
Titolo	Data-Based Child Advocacy : Using Statistical Indicators to Improve the Lives of Children / / by William P. O'Hare
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2014
ISBN	3-319-07830-5
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (71 p.)
Collana	SpringerBriefs in Well-Being and Quality of Life Research, , 2211-7644
Disciplina	152.4
Soggetti	Quality of life Human rights Statistics Quality of Life Research Human Rights Statistics for Social Sciences, Humanities, Law
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	Introduction -- 1 What is Data-Based Child Advocacy? -- 2 Types of Advocacy Activity Using Child Indicators -- 2.1 Increasing Public Awareness about Child Well-Being -- 2.2 Making Data on Child Well-Being Easily Available -- 2.3 Advocating for More and Better Data on Children -- 2.4 Child Well-being Monitoring -- 2.5 Goal Setting -- 2.6 Evaluating Programs and Policies -- 3 Development of the Data-Based Child Indicator Movement -- 4 Communication Issues -- 5 Conclusions -- Appendix 1 Data-Based Child Advocacy in Latin America -- Appendix 2. Some Key Questions Regarding Data-Based Child Advocacy Publications.
Sommario/riassunto	This book locates, organizes and summarizes information about the use of child indicators in an advocacy context. It provides a conceptual framework that allows readers to see a wide variety of work as part of a unified field. It provides a description of key concepts and illustrates these concepts by offering many examples from a range of countries and a wide variety of applications. It covers work from governments, non-governmental organization, and academics. It describes such

aspects as the use of data to educate and increase public awareness, as well as to monitor, set goals and evaluate programs serving children. A growing number of organizations and people are focusing on measuring and monitoring the well-being of children, and these child well-being data are often employed in ways that go beyond what is typically considered scholarship. Many of these applications involve some type of advocacy activity. Yet, there is very little in the literature about the use of child indicators in an advocacy context. This book provides a framework for scholars in a variety of disciplines that will help them to structure their thinking about the use of such indicators in a public context.
