

1. Record Nr.	UNINA9910483614403321
Titolo	Human interface and the management of information : methods, techniques and tools in information design : symposium on human interface 2007, held as part of HCI international 2007, Beijing, China, July 22-27, 2007, proceedings, part I // Michael J. Smith, Gavriel Salvendy, editors
Pubbl/distr/stampa	Berlin ; ; Heidelberg : , : Springer-Verlag, , [2007] ©2007
ISBN	3-540-73345-0
Edizione	[1st ed. 2007.]
Descrizione fisica	1 online resource (XXII, 1030 p.)
Collana	Lecture Notes in Computer Science ; ; 4557
Disciplina	004
Soggetti	Computer science Data mining
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	I: Design and Evaluation Methods and Techniques -- II: Visualising Information -- III: Retrieval, Searching, Browsing and Navigation -- IV: Development Methods and Techniques -- V: Advanced Interaction Technologies and Techniques.
Sommario/riassunto	The 12th International Conference on Human-Computer Interaction, HCI International 2007, was held in Beijing, P.R. China, 22-27 July 2007, jointly with the Symposium on Human Interface (Japan) 2007, the 7th International Conference on Engineering Psychology and Cognitive Ergonomics, the 4th International Conference on Universal Access in Human-Computer Interaction, the 2nd International Conference on Virtual Reality, the 2nd International Conference on Usability and Internationalization, the 2nd International Conference on Online Communities and Social Computing, the 3rd International Conference on Augmented Cognition, and the 1st International Conference on Digital Human Modeling. A total of 3403 individuals from academia, research institutes, industry and governmental agencies from 76 countries submitted contributions, and 1681 papers, judged to be of high scientific quality, were included in the program. These papers address the latest research and development efforts and highlight the

human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. This volume, edited by Michael J. Smith and Gavriel Salvendy, contains papers in the thematic area of Human Interface and the Management of Information, addressing the following major topics: • Design and Evaluation Methods and Techniques • Visualizing Information • Retrieval, Searching, Browsing and Navigation • Development Methods and Techniques • Advanced Interaction Technologies and Techniques.
