

1. Record Nr.	UNINA9910483652403321
Autore	Pei Anping
Titolo	A Study of Prehistoric Settlement Patterns in China // by Anping Pei
Pubbl/distr/stampa	Singapore : , : Springer Singapore : , : Imprint : Springer, , 2020
ISBN	981-15-3060-2
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (507 pages)
Disciplina	307.140951
Soggetti	Cultural heritage Archaeology History, Ancient Cultural Heritage Ancient History
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction -- Chapter 1 The Clustering Pattern of Sites in the Paleolithic Age -- Chapter 2 The Clustering Pattern of Settlements in the Middle Neolithic Era -- Chapter 3 The Clustering Pattern of Settlements in the Middle Reaches of the Yangtze River in the Late Neolithic Period -- Chapter 4 The Clustering Pattern of Settlements in the Middle Reaches of the Yellow River in the Late Neolithic Age -- Chapter 5 The Clustering Pattern of Settlements in the Lower Reaches of the Yellow River in the Late Neolithic Era -- Chapter 6 Case Studies of the Clustering Pattern of Settlements in the Prehistoric Period and the Late Shang Dynasty -- Conclusion.
Sommario/riassunto	This book is the first-ever monograph on clustering patterns in prehistoric settlements. It not only theoretically explains the difference between natural settlement communities and organizational forms for the first time, but also demonstrates the importance of understanding this difference in practical research. Based on extensive archaeological data from China and focusing on the evolution of prehistoric settlements and changing social relations, the book completely breaks with the globally popular research mode which is based on the assumption that settlement archaeology has nothing to do with prehistoric social organization. In terms of research methods, the book

also abandons the globally popular method of measuring the grade and importance of settlements according to their size and the value of the unearthed objects. Instead, it focuses on understanding settlements' attributes from the combined perspective of the group and individuals. On the one hand, the book proves that the clustering patterns in prehistoric settlement sites reflect the organizational forms of the time; on the other, it demonstrates that historical research focusing on the organizational forms of prehistoric societies is closer to the historical reality and of more scientific value. The intended readership includes graduates and researchers in the field of archaeology, or those who are interested in cultural relics and prehistoric settlements.
