Convergence Criteria""; ""B. The Core Currency Union Statistics""; ""C. Statistics on the External Aspects of a Currency Union""; ""D. Statistics on the Macroeconomy and the Effectiveness of Policy""; ""E. Statistics for Dissemination to the Public""; ""F. Specialized Statistics""; ""VI. CONCLUSIONS"" ""References""
Sommario/riassunto	Looking ahead to the creation of a Gulf Cooperation Council (GCC) Currency Union in 2010, the paper covers some implications for the statistical programs of the GCC countries. Despite uncertainty over the structure of the proposed union, the paper envisions several types of mutually reinforcing statistics-convergence criteria, statistics on the core policy variables and instruments, additional macroeconomic data, specialized statistics related to the economic and institutional conditions within the union, and public information. Major changes to national statistical programs are needed that should begin soon.

Sommario/riassunto

This book constitutes the refereed proceedings of the 9th International Conference on Parallel Computing Technologies, PaCT 2007, held in conjunction with the Russian-Taiwan symposium on Methods and Tools of Parallel Programming of Multicomputers. It covers models and languages, applications, techniques for parallel programming supporting, cellular automata, as well as methods and tools of parallel programming of multicomputers.
