

1. Record Nr.	UNINA9910483847903321
Titolo	Transactions on Computational Science XXVI [[electronic resource]] : Special Issue on Cyberworlds and Cybersecurity // edited by Marina L. Gavrilova, C.J. Kenneth Tan, Andrés Iglesias, Mikio Shinya, Akemi Galvez, Alexei Sourin
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2016
ISBN	3-662-49247-4
Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (XV, 173 p. 90 illus. in color.)
Collana	Transactions on Computational Science, , 1866-4733 ; ; 9550
Disciplina	004
Soggetti	Computer security Biometrics (Biology) Pattern recognition Optical data processing Information storage and retrieval Application software Systems and Data Security Biometrics Pattern Recognition Image Processing and Computer Vision Information Storage and Retrieval Information Systems Applications (incl. Internet)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Image-Based Virtual Try-On System with Garment Reshaping and Color Correction -- Constructive Roofs from Solid Building Primitives -- Isometric Shape Correspondence Based on the Geodesic Structure -- Individual Theta/Beta Based Algorithm for Neurofeedback Games to Improve Cognitive Abilities -- Scale-invariant Heat Kernel Mapping for Shape Analysis -- A Community-Built Virtual Heritage Collection -- Identifying Users from Online Interactions in Twitter -- Applying Geometric Function on Sensors 3D Gait Data for Human Identification

-- The Influences of Online Gaming on Leadership Development -- An Efficient Pose-Tolerant Face Recognition Approach.

Sommario/riassunto

The LNCS journal Transactions on Computational Science reflects recent developments in the field of Computational Science, conceiving the field not as a mere ancillary science but rather as an innovative approach supporting many other scientific disciplines. The journal focuses on original high-quality research in the realm of computational science in parallel and distributed environments, encompassing the facilitating theoretical foundations and the applications of large-scale computations and massive data processing. It addresses researchers and practitioners in areas ranging from aerospace to biochemistry, from electronics to geosciences, from mathematics to software architecture, presenting verifiable computational methods, findings, and solutions, and enabling industrial users to apply techniques of leading-edge, large-scale, high performance computational methods. This, the 26th issue of the Transactions on Computational Science journal, is comprised of ten extended versions of selected papers from the International Conference on Cyberworlds 2014, held in Santander, Spain, in June 2014. The topics covered include areas of virtual reality, games, social networks, haptic modeling, cybersecurity, and applications in education and arts.
