

1. Record Nr.	UNINA9910483877403321
Titolo	Dependable Software Engineering. Theories, Tools, and Applications : Third International Symposium, SETTA 2017, Changsha, China, October 23-25, 2017, Proceedings // edited by Kim Guldstrand Larsen, Oleg Sokolsky, Ji Wang
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
ISBN	3-319-69483-9
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (XVIII, 351 p. 74 illus.)
Collana	Programming and Software Engineering ; ; 10606
Disciplina	005.1
Soggetti	Software engineering Computer logic Mathematical logic Computer simulation Mathematical statistics Software Engineering Logics and Meanings of Programs Mathematical Logic and Formal Languages Simulation and Modeling Probability and Statistics in Computer Science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Probabilistic and Statistical Analysis -- Timed and Hybrid Systems -- Program Analysis -- Modeling and Verification.- Formalization -- Tools.
Sommario/riassunto	This book constitutes the proceedings of the Third International Symposium on Dependable Software Engineering: Theories, Tools, and Applications, SETTA 2017, held in Changsha, China, in October 2017. The 19 full papers presented together with 3 invited talks were carefully reviewed and selected from 31 submissions. The aim of the symposium is to bring together international researchers and practitioners in the field of software technology. Its focus is on

probabilistic and statistical analysis; timed and hybrid systems;
program analysis; modeling and verification; formalization; and tools.
