

1. Record Nr.	UNINA9910483889803321
Titolo	Tutorials in suturing techniques for orthopedics // Peifu Tang [and four others], editors
Pubbl/distr/stampa	Singapore : , : Springer, , [2021] ©2021
ISBN	981-336-330-4
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (XIII, 375 p. 437 illus., 368 illus. in color.)
Disciplina	617.47
Soggetti	Orthopedic surgery - Technique Suturing Sutures (Chirurgia) Chirurgia ortopedica Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	The History of Knots and Surgical Suturing -- Basics of Orthopaedic Soft Tissue Repairing and Healing -- Prevention and Control Measures for Surgical Site Infection -- Design and Selection of Surgical Suturing Materials -- Basic Technical Training on Orthopaedic Suturing -- Orthopaedic Operating Room Setup and Aseptic Technique -- Tendon Suturing Technique in Hand Surgery -- Achilles Tendon Rupture Suturing Technique -- Suturing Technique for Soft Tissue Reconstruction around Upper Limb Joint -- Suturing Technique of Incisions after Arthroplasty -- Skin Cosmetic Suturing and Irregular Skin Wound Suturing -- Suturing Techniques in Microscopic Reconstruction -- Suturing Techniques in Spinal Soft Tissue Reconstruction -- Orthopaedic Knotting Skills -- Orthopaedic Drainage.
Sommario/riassunto	This book introduces the surgical suture techniques in orthopaedics. These techniques have been recognized as a crucial part for wound care and surgery-related prognosis. Training of fellows on suture techniques is of great importance. This book provides a standard tutorial on how to be proficient in surgical suture performance. The

history and basic concepts are introduced. Important issues when considering suture methods, including site infections, suturing materials, room setups, cosmetics and drainage are also discussed fully. Different types of suture techniques applying to orthopaedic surgeries are presented with illustrations. The author strives to implement the principle that orthopaedic theory should be connected with clinical practice, highlight the application of theoretical knowledge, strengthen the pertinence and practicality of suture techniques, and reflect domestic and international development trends to the greatest extent.
