

1. Record Nr.	UNINA9910483916403321
Autore	Pedrycz Witold
Titolo	An Introduction to Computing with Fuzzy Sets : Analysis, Design, and Applications / / by Witold Pedrycz
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2021
ISBN	9783030528003 3030528006
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (287 pages)
Collana	Intelligent Systems Reference Library, , 1868-4394 ; ; 190
Disciplina	511.322
Soggetti	Computational intelligence Applied mathematics Engineering mathematics Computational Intelligence Mathematical and Computational Engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book provides concise yet thorough coverage of the fundamentals and technology of fuzzy sets. Readers will find a lucid and systematic introduction to the essential concepts of fuzzy set-based information granules, their processing and detailed algorithms. Timely topics and recent advances in fuzzy modeling and its principles, neurocomputing, fuzzy set estimation, granulation–degranulation, and fuzzy sets of higher type and order are discussed. In turn, a wealth of examples, case studies, problems and motivating arguments, spread throughout the text and linked with various areas of artificial intelligence, will help readers acquire a solid working knowledge. Given the book’s well-balanced combination of the theory and applied facets of fuzzy sets, it will appeal to a broad readership in both academe and industry. It is also ideally suited as a textbook for graduate and undergraduate students in science, engineering, and operations research.
