

1. Record Nr.	UNINA9910483926903321
Autore	Hallevy Gabriel
Titolo	Liability for Crimes Involving Artificial Intelligence Systems // by Gabriel Hallevy
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-10124-2
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (262 p.)
Disciplina	006.3 340 340.1 343.0999 345 364
Soggetti	International criminal law Artificial intelligence Computers Law and legislation Law—Philosophy Law Criminology International Criminal Law Artificial Intelligence Legal Aspects of Computing Theories of Law, Philosophy of Law, Legal History Criminology and Criminal Justice, general
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Chapter 1 – Artificial Intelligence Technology and Modern Technological Delinquency -- Chapter 2 – Basic Requirements of Modern Criminal Liability -- Chapter 3 – External Element Involving Artificial Intelligence Systems -- Chapter 4 – Positive Fault Element Involving Artificial Intelligence Systems -- Chapter 5 – Negative Fault Elements and

Sommario/riassunto

The book develops a general legal theory concerning the liability for offenses involving artificial intelligence systems. The involvement of the artificial intelligence systems in these offenses may be as perpetrators, accomplices or mere instruments. The general legal theory proposed in this book is based on the current criminal law in most modern legal systems. In most modern countries, unmanned vehicles, sophisticated surgical systems, industrial computing systems, trading algorithms and other artificial intelligence systems are commonly used for both industrial and personal purposes. The question of legal liability arises when something goes wrong, e.g. the unmanned vehicle is involved in a car accident, the surgical system is involved in a surgical error or the trading algorithm is involved in fraud, etc. Who is to be held liable for these offenses: the manufacturer, the programmer, the user, or, perhaps, the artificial intelligence system itself? The concept of liability for crimes involving artificial intelligence systems has not yet been widely researched. Advanced technologies are forcing society to face new challenges, both technical and legal. The idea of liability in the specific context of artificial intelligence systems is one such challenge that should be thoroughly explored. .
