

1. Record Nr.	UNINA9910483947803321
Titolo	Reliability and Statistics in Transportation and Communication : Selected Papers from the 19th International Conference on Reliability and Statistics in Transportation and Communication, RelStat'19, 16-19 October 2019, Riga, Latvia // edited by Igor Kabashkin, Irina Yatskiv, Olegas Prentkovskis
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-44610-7
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (717 pages)
Collana	Lecture Notes in Networks and Systems, , 2367-3389 ; ; 117
Disciplina	380
Soggetti	Computational intelligence Transportation engineering Traffic engineering Industrial management Data mining Statistics Computational Intelligence Transportation Technology and Traffic Engineering Industrial Management Data Mining and Knowledge Discovery Applied Statistics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	This book reports on cutting-edge theories and methods for analyzing complex systems, such as transportation and communication networks and discusses multi-disciplinary approaches to dependability problems encountered when dealing with complex systems in practice. The book presents the most noteworthy methods and results discussed at the International Conference on Reliability and Statistics in Transportation and Communication (RelStat), which took place in Riga, Latvia on

October 16 – 19, 2019. It spans a broad spectrum of topics, from mathematical models and design methodologies, to software engineering, data security and financial issues, as well as practical problems in technical systems, such as transportation and telecommunications, and in engineering education.
