

1. Record Nr.	UNINA9910483961803321
Titolo	Recent advances in structural engineering : select proceedings of ncrase 2020 // edited by Srinivasan Chandrasekaran, Shailendra Kumar, Seeram Madhuri
Pubbl/distr/stampa	Singapore : , : Springer, , [2021] ©2021
ISBN	981-336-389-4
Descrizione fisica	1 online resource (261 pages) : illustrations
Collana	Lecture Notes in Civil Engineering ; ; v.135
Disciplina	605
Soggetti	Structural engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Intro -- Preface -- Contents -- About the Editors -- Advanced Structural Materials -- A Sustainable Concrete with Manufactured Sand in Different Aggressive Environments -- 1 Introduction -- 2 Experimental Investigation -- 2.1 Materials and Their Properties -- 2.2 Mix Proportioning -- 3 Results and Discussion -- 3.1 Compressive Strength Loss -- 3.2 Visual Inspection -- 3.3 XRD Analysis -- 4 Conclusion -- References -- Mechanical Performance of Self-compacting Concrete with Pozzolanic Material -- 1 Introduction -- 2 Experimental Investigation -- 2.1 Materials and Their Properties -- 2.2 Mix Proportioning -- 2.3 Fresh Properties -- 2.4 Hardened Properties -- 2.5 XRD and SEM Analysis -- 3 Results and Discussion -- 3.1 Fresh Properties -- 3.2 Hardened Properties -- 3.3 XRD and SEM Analyses of Referral and Optimum SCC -- 4 Conclusions -- References -- Studies on Infiltration Rate of Pervious Concrete -- 1 Introduction -- 2 Materials and Mix Design -- 2.1 Material Properties -- 2.2 Mix Design -- 2.3 Results and Discussions -- 3 Conclusions -- References -- Properties of Concrete with Bagasse Ash and Stone Dust Exposed to Sulphate Attack -- 1 Introduction -- 2 Experimental Program -- 2.1 Materials Used -- 2.2 Concrete Sample Preparation -- 2.3 Methods -- 3 Results and Discussion -- 3.1 Compressive Strength (CS) -- 3.2 SEM and EDS Analyses -- 4 Conclusions -- References -- Torque and Twist Response of High-Grade Concrete Beams with "U" Jacketing

of Ferrocement -- 1 Introduction -- 1.1 Research Significance -- 2 Methods to Predict Torque and Twist -- 2.1 Experimental Program -- 2.2 Analytical Model -- 2.3 Soft Computing Method -- 3 Interpretation of Test Results -- 3.1 General Behaviour of High Strength Beams -- 3.2 General Behaviour of High Strength Beams -- 3.3 Twist at Cracking Torque of High Strength Beams -- 4 Conclusions -- References.

Stress-Strain Behaviour of Self-consolidated Processed Recycled Aggregate Concrete -- 1 Introduction -- 2 Experimental Program -- 2.1 Cementitious Materials -- 2.2 Aggregates -- 2.3 Superplasticizer -- 2.4 Mix Proportions -- 2.5 Preparation of Specimens -- 2.6 Green Properties of RASCC -- 3 Results and Discussion -- 3.1 Compressive Strength -- 3.2 Stress-Strain Curves -- 4 Conclusions -- References --

Study of Compressive Strength of Self-compacting Concrete Using Rice Husk Ash and Nano Silica as a Partial Replacement to Cement: A Comparative Study -- 1 Introduction -- 2 Proposed Methodology and Discussion -- 3 Material Characteristics -- 4 Experimental Test and Result -- 5 Conclusion -- References --

Analysis and Design of Structures -- Bayesian Finite Element Model Updating Without Requirement of Mode-Matching and Sub-structuring of System Matrices -- 1 Introduction -- 2 Formulation of the Bayesian Updating Method -- 2.1 Formulation of $p(\cdot)$ -- 2.2 Formulation of $p(D|\cdot)$ -- 2.3 Objective Function of the Optimization Problem -- 2.4 Optimization Framework -- 3 Estimation of Uncertainty in Posterior PDF -- 4 Validation and Applicability of the Updating Method -- 5 Conclusion -- References --

Free Vibration Analysis of Reissner-Mindlin Plates Using FEniCS -- 1 Introduction -- 2 Finite Element Formulation of the Reissner-Mindlin Plate [5, 6] -- 3 FEniCS Implementation -- 3.1 Results and Discussion -- 4 Conclusion -- References --

Response of Delamination on Static Behaviour of Simply Supported Composite Conoidal Shell Roofs -- 1 Introduction -- 2 Mathematical Formulation -- 3 Benchmark Problems -- 4 Results and Discussion -- 4.1 Effects of Aspect Ratio on Maximum Transverse Deflection -- 4.2 Effects of Extent of Delamination on Maximum Transverse Deflection -- 5 Conclusions -- References.

Effect of Steel Fibre on Mechanical Properties of Metakaolin-Mixed Concrete -- 1 Introduction -- 2 Experimental Study -- 2.1 Raw Materials and Their Properties -- 3 Methodology -- 4 Results and Discussion -- 4.1 Fresh Properties of Concrete -- 5 Conclusion -- References --

Dynamic Analysis of Telecommunication Tower Subjected to Wind Load with Different Configurations of Bracings -- 1 Introduction -- 2 Brief Literature Review -- 3 Modelling, Analysis and Design -- 4 Loading -- 5 Results and Discussions -- 6 Conclusions -- References --

Effect of Stiffeners on the Natural Frequencies of Stiffened Plate -- 1 Overview -- 2 Finite Element Modelling -- 3 Results and Discussion -- 3.1 Example 1 -- 3.2 Example 2 -- 3.3 Example 3 -- 4 Conclusions -- References --

Bridges -- Damage Evaluation of Reinforced Concrete Bridge Subjected to Blast Loading -- 1 Introduction -- 2 Numerical Modeling -- 2.1 Blast Pressure-time History -- 2.2 Concrete Damaged Plasticity Model -- 3 Results and Discussions -- 4 Conclusions -- References --

Structural Dynamics -- Performance of RC Frames with Stiffness Irregularity Under Sequential Ground Motion -- 1 Introduction -- 2 Structural Models -- 3 Input Ground Motions -- 4 Theory -- 5 Results and Discussions -- 5.1 Seismic Behavior of Regular and Irregular Building Models -- 5.2 Maximum Horizontal Top Displacements -- 5.3 Maximum Residual Displacements -- 5.4 Maximum Storey Drift -- 5.5 Maximum Residual Inter Storey Drift -- 5.6 Performance of the Frame -- 6 Conclusion -- References --

Influence of Marine Growth

on the Static Response of Jacket Wind Turbine -- 1 Introduction -- 2 Brief Literature Review -- 3 Modeling of Jacket and Tower -- 4 Estimation of Loads -- 4.1 Dead Load and Live Load -- 4.2 Wind Load -- 4.3 Hydrodynamic Force (Wave and Current) -- 4.4 Marine Growth -- 5 Analysis of Horizontal Axis Offshore Wind Turbine. 6 Results and Discussions -- 7 Conclusions -- 8 Notations and Abbreviations -- References -- Dynamic Time History Analysis of Masonry Tower Using Macro Modelling Approach -- 1 Introduction -- 2 About Senate Hall Building and Existing Damages -- 2.1 Geometric Description of the Tower -- 2.2 Existing Damages -- 3 Finite Element Modelling -- 4 Dynamic Time History Analysis -- 5 Results and Discussion -- 6 Conclusion -- References -- Special Loads on Structures -- Performance of One-Way Concrete Slabs Reinforced with Conventional and Polymer Re-bars Under Air-Blast Loading -- 1 Introduction -- 2 Numerical Modeling -- 2.1 Time-Dependent Blast Pressure, P(T) -- 2.2 CDP Model and Convergence Test -- 3 Results and Discussions -- 3.1 Normal Reinforced Concrete Slabs (C1) -- 3.2 Concrete Slabs Reinforced on Blast Face with 50% HYSD Steel and 50% FRP Re-bars (C2) -- 3.3 Concrete Slabs Reinforced on Remote Face with 50% HYSD Steel and 50% FRP Re-Bars (C3) -- 3.4 Concrete Slabs Reinforced on Both Faces with 50% HYSD Steel and 50% FRP Re-Bars (C4) -- 4 Conclusions -- References -- Structural Vulnerability of Buildings Exposed to Earthquake in Hilly Region: A Conceptual Framework -- 1 Introduction -- 2 Conceptual Framework for Structural Vulnerability of Building Exposed to Earthquake -- 3 Conclusions -- References -- Active Seismic Control of Structures Using Pole Placement Technique -- 1 Introduction -- 2 Equation of Motion of the Structure with Active Tendons -- 3 State-Space Realization of Equation of Motion of the Building Frame -- 4 Pole Placement Technique -- 5 Simulation Methodology -- 6 Results and Discussion -- 7 Conclusion -- References -- Response of Multi-Storeyed Structures Subjected to Blast Loading -- 1 Introduction -- 2 Methodology -- 2.1 Preliminary Data -- 2.2 Details of Models -- 2.3 Loading Data -- 2.4 Calculation of Blast Pressure. 2.5 Application of Blast Pressure -- 3 Results and Discussions -- 4 Conclusion -- References -- Efficacy of Lateral Load Resisting Systems in High-Rise Structures -- 1 Introduction -- 2 Methodology -- 2.1 Diagonal Strut with Masonry Infill System -- 2.2 Outrigger System -- 2.3 Diagrid System -- 3 Results and Discussions -- 4 Conclusion -- References -- Stability Analysis of an RC Structure with RC Shear Walls in the Event of a Fire -- 1 Introduction -- 2 Analysis of RC Multi-storey Building Exposed to High Temperature with and Without Shear Walls -- 3 Details of Models -- 4 Results and Discussion -- 5 Conclusions -- References -- A Comparative Study of Wind Effects on High-Rise Structures Having Different Shapes in Plan -- 1 Introduction -- 2 Methodology -- 2.1 Preliminary Data -- 2.2 Loading Data and Wind Load Coefficients [6] -- 2.3 Strouhal Number (Sr) -- 3 Results and Discussions -- 4 Conclusion -- References -- Experimental and Numerical Modeling of Wave Transmission Over Submerged Breakwater and Rigid Vegetation -- 1 Introduction -- 2 Experimental Investigation -- 2.1 Testing Facility -- 2.2 Fabrication of Physical Models -- 3 Numerical Investigation -- 4 Results and Discussion -- 4.1 Effect of Wave Steepness (H/L) -- 4.2 Reliability of the Numerical Modeling -- 5 Conclusions -- References.
