

1. Record Nr.	UNINA9910483963403321
Titolo	Advanced Information Networking and Applications : Proceedings of the 35th International Conference on Advanced Information Networking and Applications (AINA-2021), Volume 2 // edited by Leonard Barolli, Isaac Woungang, Tomoya Enokido
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2021
ISBN	3-030-75075-2
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (xxx, 797 pages) : illustrations (some color)
Collana	Lecture Notes in Networks and Systems, , 2367-3389 ; ; 226
Disciplina	004.6
Soggetti	Engineering - Data processing Computational intelligence Artificial intelligence Data Engineering Computational Intelligence Artificial Intelligence Xarxes d'ordinadors Computació distribuïda Xarxes d'informació Intel·ligència artificial Llibres electrònics Congressos
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Because of COVID-19 situation, AINA-2021 will be held online"-- Conference website
Nota di bibliografia	Includes author index.
Sommario/riassunto	This book covers the theory, design and applications of computer networks, distributed computing and information systems. Networks of today are going through a rapid evolution, and there are many emerging areas of information networking and their applications. Heterogeneous networking supported by recent technological advances in low-power wireless communications along with silicon integration of

various functionalities such as sensing, communications, intelligence and actuations is emerging as a critically important disruptive computer class based on a new platform, networking structure and interface that enable novel, low-cost and high-volume applications. Several of such applications have been difficult to realize because of many interconnections problems. To fulfill their large range of applications, different kinds of networks need to collaborate, and wired and next-generation wireless systems should be integrated in order to develop high-performance computing solutions to problems arising from the complexities of these networks. The aim of the book “Advanced Information Networking and Applications” is to provide latest research findings, innovative research results, methods and development techniques from both theoretical and practical perspectives related to the emerging areas of information networking and applications.
