Sommario/riassunto	From comparative perspective, this book explores the dynamics of child soldiering on the Myanmar-China border (i.e., Kachin and Shan States of Myanmar). At the same time, this book examines the structural factors and specific relationships between child soldiers, which have impacts on child soldiering. This book reveals that Myanmar has limited power to reduce child soldiering on the Myanmar-China border, and there is no optimal solution for reducing child soldiering in the near

future. Instead, the book introduces the “transnational public-private partnership” approach as a “second best” solution and proposes suitable countermeasures for all the stakeholders.
