Soggetti	Medicine - Philosophy Medical ethics Science - Ethics Philosophy Science Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Frontmatter -- Table of Contents -- Foreword -- 1. Science, Morals, and Philosophy -- 2. How and Why Does Science Develop? -- 3. What Is a Scientific Fact? -- 4. What Does Scientific Argumentation Look Like? -- 5. Knowing How and Knowing That -- 6. The Clinical Medical Paradigm -- 7. Placebo and Nocebo Phenomena -- 8. Pluralism and Medical Science -- 9. Medicine and Ethics -- 10. Medical Research Ethics -- 11. Taxonomy, Partonomy, and Ontology -- Index of Names -- Index of Subjects -- Picture Acknowledgements
Sommario/riassunto	This textbook introduces the reader to basic problems in the philosophy of science and ethics, mainly by means of examples from medicine. It is based on the conviction that philosophy, medical science, medical informatics, and medical ethics are overlapping disciplines. It claims that the philosophical lessons to learn from the twentieth century are not that nature is a 'social construction' and that 'anything goes' with respect to methodological and moral rules. Instead, it claims that there is scientific knowledge, but that it is never completely secure; that there are norms, but that they are situation-bound; and that, therefore, it makes good sense to search for scientific

truths and try to act in a morally decent way. Using philosophical catchwords, the authors advocate 'fallibilism' and 'particularism'; a combination that might be called 'pragmatic realism'.

Indication -- EMR for esophagus -- EMR for stomach -- EMR for colon -- Endoscopic Submucosal Dissection: General -- Endoscopic Submucosal Dissection for Stomach -- Techniques of Endoscopic Submucosal Dissection for Esophagus -- Techniques of Endoscopic Submucosal Dissection for Colon -- Complications of endoscopic resection and management -- Management of non-curative resection and local recurrence after endoscopic resection for early gastrointestinal neoplasia.

**Sommario/riassunto**

Endoscopy in Early Gastrointestinal Cancers, Volume 2: Treatment covers the detailed information of the indications, techniques and perioperative management of endoscopic resection including endoscopic mucosal resection (EMR) and endoscopic submucosal dissection (ESD). Carcinoma of the gastrointestinal tract remained a major health issue worldwide, which is, however notoriously difficult to treat. Endoscopic resection for early neoplasia of the gastrointestinal

tract had been developed for more than 25 years. Endoscopic submucosal dissection (ESD) is a recently developed technique pioneer by Japanese endoscopists. The principle of ESD is to achieve a complete resection of gastrointestinal neoplasia limited to mucosa with adequate circumferential margins. This novel endoscopic technique not only allows the achievement of en-bloc resection for early GI cancers, it also conveys a significantly lower rate of local recurrence as compared to EMR for early gastric cancers. There is an urge for the knowledge in applying these novel technologies for the treatment of early GI neoplasia worldwide. This book on the endoscopic treatment of early GI neoplasia, containing lots of illustrations, artwork and numerous short video clips, serves as a bridge between the recent development in endoscopy and the knowledge of gastroenterologist, endoscopist and surgeons.

3. Record Nr.	UNIORUON00056700
Autore	FORBES, Duncan
Titolo	A grammar of the Hindustani language in the Oriental and Roman character : with numerous copper plate illustrations of the Persian and Devanagari systems of alphabetic writing [...] / By Duncan Forbes
Pubbl/distr/stampa	London, : Wm. H. Allen & Co., 1846
Descrizione fisica	1 v. : ill. ; 22 cm
Classificazione	SI II IND DB
Soggetti	LINGUA URDU - Grammatica
Lingua di pubblicazione	Urdu Hindi Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
