1.	Record Nr.	UNINA9910483989903321
	Titolo	Neuro-BehcÌ§et's disease : pathogenesis, clinical aspects, treatment / / Erdem TuÌzuÌn and Murat KuÌrtuÌncuÌ (editors)
	Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] Â©2021
	ISBN	3-030-55272-5
	Edizione	[1st ed. 2021.]
	Descrizione fisica	viii, 172 pages, 15 illus. (color)
	Disciplina	616.545
	Soggetti	Nervous system - Diseases BehcÌ§et's disease
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Includes index.
	Nota di contenuto	1. Neuro-Behçet's Disease: Epidemiology and Genetics -- 2. Immunology of Neuro-Behçet's Disease -- 3. Autoantibodies in Neuro-Behçet Disease -- 4. Animal Models of Behçet's Disease -- 5. Pathology of Neuro-Behçets Disease -- 6. Behçet's Disease: Clinical Features -- 7. Neuro-Behçet Syndrome: Differential Diagnosis -- 8. Neuro-Behçet Syndrome: Clinical Features -- 9. The Cerebrospinal Fluid Presentations of Neuro-Behçet Disease -- 10. Imaging of Neuro-Behçet's Disease -- 11. Neuropsychiatric Symptoms In Neuro-Behçet's Disease -- 12. Treatment of Neuro-Behçet's Disease -- 13. Prognosis of Behçet's Syndrome.
	Sommario/riassunto	This contributed volume provides a complete overview of Neuro-Behçet's disease (NBD), one of the most serious manifestations of Behçet's disease. It serves as a comprehensive and critical review of the current scientific literature regarding NBD, covering the epidemiology, pathology, prognosis, and treatment of the disease. This book is an essential resource for both researchers and physicians working on neurology, rheumatology, and internal medicine fields.
