Disciplina	004 340 340.2 340.9
Soggetti	Private international law Conflict of laws International law Trade Application software Computers Law and legislation Private International Law, International & Foreign Law, Comparative Law International Economic Law, Trade Law Computer Appl. in Administrative Data Processing Legal Aspects of Computing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	1. Introduction -- 2. Methodology -- 3. Defining eConveyancing -- 4. Defining Title Registration -- 5. Identification of Risks -- 6. Before Registration -- 7. The Register -- 8. After Registration -- 9. Conclusion.
Sommario/riassunto	This work is an assessment of how to manage risk in property transactions in the context of the move from paper-based to electronic conveyancing (eConveyancing). In particular the focus is on risks that impact on title registration, and the security, protection or lack thereof

that this registration offers to land owners, third parties and property claimants. The impact is the extent to which a change in the transactional process may unintentionally affect risk (being the consequence of change and the likelihood of that consequence having a negative effect). The risks are identified, analysed and evaluated against the backdrop of title registration and the development of eConveyancing through a comparative analysis of the systems in Ireland and Ontario, while also referencing other developing electronic systems around the globe.
