

1. Record Nr.	UNINA9910484023103321
Autore	Pieper Stefan
Titolo	Fluoroquinolone-Associated Disability (FQAD) - Pathogenesis, Diagnostics, Therapy and Diagnostic Criteria : Side-effects of Fluoroquinolones / by Stefan Pieper
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2021
ISBN	3-030-74173-7
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (X, 70 p. 2 illus.)
Disciplina	615.7922
Soggetti	Internal medicine Family medicine Critical care medicine Internal Medicine General Practice and Family Medicine Intensive Care Medicine Antibiòtics Efectes secundaris dels medicaments Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	1 Introduction to Fluoroquinolone-Associated Disability (FQAD) -- 2 FQAD and Oxidative Stress and Mitochondrial Toxicity -- 3 FQAD and Musculoskeletal Damage / Collagen Disorder -- 4 FQAD and Neurotoxicity / Peripheral Neuropathy (PN) / Autonomic Neuropathy / Small Fibre Neuropathy -- 5 FQAD and Neuropsychiatric Adverse Effects -- 6 Diagnostic criteria of the FQAD -- 7 Inside Story - Practical experience with FQAD Patients.
Sommario/riassunto	In this book, Stefan Pieper supports doctors and therapists in easily diagnosing FQAD and in better and more adequately dealing with FQAD patients. Fluoroquinolones, as one of the most common and effective groups of antibiotics, are known to have a distinct spectrum of side effects. These adverse effects are rare in percentage terms, but frequent in absolute numbers due to the enormous quantities of

prescriptions. Because they are usually quite severe and wide-ranging, they tend to run like a syndrome and have been classified by the FDA as a separate condition, the FQAD, because of their frequency, severity and risk of disability. This book presents for the first time a comprehensive description and classification of the clinical picture and a proposal for a clinical diagnostic tool based on diagnostic criteria.
