

1. Record Nr.	UNINA9910484065603321
Titolo	Information technologies and mathematical modelling : queueing theory and applications : 19th international conference, ITMM 2020, named after A.F. Terpugov, Tomsk, Russia, December 2-5, 2020, revised selected papers // Alexander Dudin, Anatoly Nazarov, Alexander Moiseev (editors)
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-72247-3
Descrizione fisica	1 online resource (xi, 431 pages) : illustrations
Collana	Communications in computer and information science ; ; 1391
Disciplina	519.82
Soggetti	Mathematical models Queueing theory Information technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Preface -- Organization -- Contents -- Some Special Features of Finite-Source Retrial Queues with Collisions, an Unreliable Server and Impatient Customers in the Orbit -- 1 Introduction -- 2 System Model -- 3 Simulation Case Studies -- 3.1 Exponentially Distributed Impatience Times -- 3.2 Generally Distributed Impatience Times -- 4 Conclusion -- References -- Improved Priority Scheme for Unreliable Queueing System -- 1 Introduction -- 2 Mathematical Model -- 3 Process of System States -- 4 Performance Measures -- 5 Numerical Examples -- 6 Conclusion -- References -- Simulation Analysis in Cognitive Radio Networks with Unreliability and Abandonment -- 1 Introduction -- 2 System Model -- 3 Simulation Results -- 3.1 Impatience Time is Exponentially Distributed -- 3.2 Impatience Time is Generally Distributed with $Cx2 >$ -- 1 -- 3.3 Impatience Time is Generally Distributed with $Cx2 <$ -- 1 -- 4 Conclusion -- References -- A Retrial Queueing System with Processor Sharing -- 1 Introduction -- 2 Mathematical Model -- 3 Process of the System States -- 4 Ergodicity Condition -- 5 Stationary Distribution. Performance Measures -- 6 Numerical Results -- 7 Conclusion -- References --

Multi-level MMPP as a Model of Fractal Traffic -- 1 Introduction -- 2 Mathematical Model of Multi-level MMPP -- 3 Derivation of Equations for Probability Distribution of the Total Amount of Information Received in Multi-level MMPP for a Certain Time -- 4 Asymptotic Analysis of the Amount of Information Received in MMPP Under Growing Time Limit Condition -- 5 Calculation Algorithm for the Moments of the Total Amount of Information Received in Multi-level MMPP -- 6 Numerical Implementation of the Analytical Results for a Three-Level MMPP -- 6.1 Gaussian Approximation Accuracy -- 7 Hurst Parameter Evaluation for Multi-level MMPP -- 8 Conclusion -- References.

Asymptotic Analysis of Intensity of Poisson Flows Assembly -- 1 Introduction -- 2 Mathematical Model -- 3 Central Limit Theorem for the Assembly Flow -- 4 Limit Relations for Intensity of Assembly of Independent and Identically Distributed Poisson Flows -- 5 Assembly of Independent Flows with Different Intensities -- 6 Convergence of Assembly Flow A2 to Poisson Flow -- 7 Conclusion -- References --

On Multiserver State-Dependent Retrial Queues Operating in Stationary Regime -- 1 Introduction -- 2 Mathematical Model of the Classical Retrial Queue with Controlled Input -- 3 Steady State Analysis of Systems with Limited Number of Retrials -- 4 Conclusion -- References --

Reducing of Service Process Dimension for a General-Type Multichannel Network in Heavy Traffic -- 1 Introduction -- 2 Model Description -- 3 Underlying Conditions -- 4 Main Result -- 5 Auxiliary Results -- 6 Proof of the Theorem -- 7 Approximative Process as a Diffusion -- 8 Conclusions -- References --

Central Limit Theorem for an M/M/1/1 Retrial Queue with Unreliable Server and Two-Way Communication -- 1 Introduction -- 2 Mathematical Model -- 3

Problem Definition -- 4 Asymptotic Analysis Under Low Rate of Retrials Condition -- 5 Numerical Examples -- 6 Conclusion -- References --

Three-Server Queue with Consultations by Main Server with a Buffer at the Main Server -- 1 Introduction -- 1.1 Notations -- 2 Description of Model -- 3 Steady State Analysis -- 3.1 Stability condition -- 3.2

Steady State Probability Vector -- 3.3 Mean Number of Interruptions to a Customer at the Main Server -- 3.4 Performance Measures -- 4

Numerical Analysis -- References -- Simulation of Railway Marshalling Yards Based on Four-Phase Queuing Systems -- 1 Introduction -- 2 Subject of Research -- 3 Field Research Results -- 4 Mathematical Model -- 4.1 Generalized Marshalling Yard Model.

4.2 Model of the Odd IrS Station System -- 5 Computational

Experiment -- 6 Conclusions -- References -- Numerical Methods to Analyses of Queuing Systems with Instantaneous Feedback, Positive Server Setup Time and Impatient Calls -- 1 Introduction and Related Work -- 2 Description of the System and Construction of the

Generating Matrix -- 3 Matrix-Geometric Method -- 4 Space Merging Method -- 5 Numerical Results -- 6 Conclusion -- References --

Waiting Time Asymptotic Analysis of a M/M/1 Retrial Queueing System Under Two Types of Limiting Condition -- 1 Introduction -- 2

Mathematical Model -- 3 Kolmogorov's Equations -- 4 Asymptotic

Analysis of the Number of Requests in the Orbit -- 5 Asymptotic Analysis of the Number of Returns of the Tagged Request to the Orbit -- 6 Distribution of the Waiting Time in the Orbit -- 7 Numerical

Results -- 8 Conclusion -- References -- On a Single Server Queueing Inventory System with Common Life Time for Inventoried Items -- 1

Introduction -- 2 Mathematical Description of the Model -- 3 Steady-State Analysis -- 3.1 Stability Condition -- 3.2 Stationary Distribution

-- 4 Performance Measures -- 5 Numerical Example -- 6 Conclusion -- References -- Resource Queueing System for Analysis of Network

Slicing Performance with QoS-Based Isolation -- 1 Introduction -- 2

System Model -- 3 Queueing System -- 4 Resource Sharing -- 5
 Demonstration of Resource Sharing Algorithm -- 5.1 State $(m,n)=(2,2)$
 -- 5.2 State $(m,n)=(1,2)$ -- 6 Numerical Analysis -- 7 Conclusion --
 References -- Infinite Markings Method in Queueing Systems with the
 Infinite Variance of Service Time -- 1 Introduction -- 2 Mathematical
 Model -- 3 Simulation of M/Pa/1 System at $D(x)=$ -- 4 A Brief
 Description of the Infinite Markings Method (IMM) -- 5 Influence of IMM
 on the Queue Determined by Request Length.
 6 Application of IMM to Computer Networks with Packet Switching -- 7
 Simulation of a Typical Network Fragment -- 8 Application IMM with
 Unknow Service Time -- 9 Conclusion -- References -- Analysis of the
 Queueing Systems with Processor Sharing Service Discipline and Random
 Serving Rate Coefficients -- 1 Introduction -- 2 Model Description -- 3
 Analysis of the Simplified Model -- 4 Analysis of the Mean Sojourn
 Time -- 5 Numerical Analysis -- 6 Conclusion -- References --
 Asymptotic-Diffusion Analysis of Multiserver Retrial Queueing System
 with Priority Customers -- 1 Introduction -- 2 Mathematical Model -- 3
 First Order Asymptotic Analysis -- 4 Second Order Asymptotic Analysis
 -- 5 Stationary Distribution of the Diffusion Process -- 6 Conclusion --
 References -- Stability Condition of a Multi-class Modified Erlang
 System -- 1 Introduction -- 2 Description of the Model -- 3 Stability
 Analysis -- 4 Simulation -- 5 Conclusion -- References -- Methods for
 Analyzing Slicing Technology in 5G Wireless Network Described as
 Queueing System with Unlimited Buffer and Retrial Group -- 1
 Introduction -- 2 Related Work: Single Server Queueing System with
 Retrial Queue -- 2.1 Mathematical Model -- 2.2 Stationary Probability
 Distribution Computation -- 3 QS with Buffer and Retrial Group for
 Modeling Network Within Slicing Technology -- 3.1 Mathematical
 Model -- 3.2 Stationary Probability Distribution Calculation -- 4
 Numerical Analysis -- 4.1 Model with Server and Retrial Queue -- 4.2
 Model with Buffer and Retrial Group -- 5 Conclusion -- References --
 The Two-Dimensional Output Process of Retrial Queue with Two-Way
 Communication -- 1 Introduction -- 2 Mathematical Model -- 3
 Kolmogorov Equations -- 4 Method of Asymptotic Analysis -- 5
 Conversion to Explicit Probability Distribution -- 6 Correlation
 Coefficient -- 7 Numerical Examples -- 8 Conclusion -- References.
 Analysis of Retrial Queueing System M/G/1 with Impatient Customers,
 Collisions and Unreliable Server Using Simulation -- 1 Introduction -- 2
 System Model -- 3 Simulation Results -- 3.1 First Scenario -- 3.2
 Second Scenario -- 4 Conclusion -- References -- A Method for
 Solving Stationary Equations for Priority Time-Sharing Service Process
 in Random Environment -- 1 Introduction -- 2 Problem Statement -- 3
 Solution Algorithm in Case of Non-preemptive Priority Policies -- 4
 Numerical Routine Details and Experiments -- 5 Conclusion --
 References -- Virtual Waiting Time in Single-Server Queueing Model
 M|G|1 with Unreliable Server and Catastrophes -- Abstract -- 1
 Introduction -- 2 Model Description -- 3 Virtual Waiting Time -- 4 The
 Idle State Probabilities -- 5 Transient Virtual Waiting Time of the Model
 M|G|1 -- 6 Conclusion -- References -- A Queueing System with
 Probabilistic Joining Strategy for Priority Customers -- 1 Introduction
 -- 2 Model Description -- 2.1 Service Policy -- 2.2 Joining Strategy of
 Priority Customer -- 3 Steady-State Analysis -- 3.1 Stability Condition
 -- 3.2 Computation of the Steady-State Vector -- 3.3 Waiting Time
 Distribution of an Ordinary Customer -- 3.4 Waiting Time Distribution
 of a Priority Customer -- 3.5 Performance Measures -- 3.6 Social
 Optimization Problem -- References -- Analysis of Closed Unreliable
 Queueing Networks with Batch Service -- 1 Introduction -- 2 The
 Model -- 3 Unreliable Networks -- 4 Performance Measures -- 5

Numerical Examples -- 6 Conclusion -- References -- On an MMAP/
(PH, PH)/1/(, N) Queueing-Inventory System -- 1 Introduction -- 2
Model Description -- 3 Mathematical Formulation -- 3.1 Stability
Condition -- 3.2 Stationary Distribution -- 4 Performance Measures --
5 Numerical Examples -- 5.1 Effect of Parameter on Performance
Measures -- 5.2 Effect of s on Various Performance Measures.
5.3 Combined Effect of s and on Sever Being Idle.
