1. Record Nr. UNINA9910484078203321 Ubiquitous Computing and Ambient Intelligence: Context-Awareness **Titolo** and Context-Driven Interaction: 7th International Conference, UCAmI 2013, Carrillo, Costa Rica, December 2-6, 2013, Proceedings / / edited by Gabriel Urzaiz, Sergio F. Ochoa, Jose Bravo, Liming Luke Chen, Jonice Oliveira Cham:,: Springer International Publishing:,: Imprint: Springer,, Pubbl/distr/stampa 2013 **ISBN** 3-319-03176-7 Edizione [1st ed. 2013.] Descrizione fisica 1 online resource (XVI, 401 p. 166 illus.) Information Systems and Applications, incl. Internet/Web, and HCI;; Collana 8276 005.7 Disciplina Soggetti Application software Computer communication systems Artificial intelligence User interfaces (Computer systems) Software engineering Computers and civilization Information Systems Applications (incl. Internet) Computer Communication Networks Artificial Intelligence User Interfaces and Human Computer Interaction Software Engineering Computers and Society Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Note generali Bibliographic Level Mode of Issuance: Monograph Nota di bibliografia Includes bibliographical references and index. Nota di contenuto Session 1: Human Interaction in Ambient Intelligence (1/2).-Context-Aware Energy Efficiency in Smart Buildings -- Magnetic-Field Feature Extraction for Indoor Location Estimation -- A Safe Kitchen for Cognitive Impaired People -- Breaking the Pattern: Study on Stereoscopic Web Perception -- Multiple Views for Supporting Lifelong, Highly Contextual and Ubiquitous Social Learning -- Boosting

Dependable Ubiquitous Computing: A Case Study -- Context-Aware

Self-adaptations: From Requirements Specification to Code Generation -- Intelligent Information System to Tracking Patients in Intensive Care Units -- Wide-Input Intelligent Environments for Industrial Facilities --Citizen-Centric Linked Data Apps for Smart Cities -- Session 2: Human Interaction in Ambient Intelligence (2/2).-Pervasive User Interface Elements as Synthetic Networked Files -- Design Lessons from Deploying NFC Mobile Payments -- User, Context and Device Modeling for Adaptive User Interface Systems -- A Case of Use of Augmented Reality for Supporting Communication in Presentations -- Improving the Process for Developing Augmented Objects: An HCI Perspective --Tangible Interfaces and Virtual Worlds: A New Environment for Inclusive Education -- Movement-Based and Tangible Interactions to Offer Body Awareness to Children with Autism -- Development Challenges in Web Apps for Public Displays -- Towards a Technology for Caregivers' Emotional Expression and Self-reflection -- A Sleep Monitoring Application for u-lifecare Using Accelerometer Sensor of Smartphone -- HARF: A Hierarchical Activity Recognition Framework Using Smartphone Sensors -- An Affective Inference Model Based on Facial Expression Analysis -- Probabilistic Situation Modeling from Ambient Sensors in a Health Condition Monitoring System -- Session 3: ICT Instrumentation and Middleware Support for Smart Environments and Objects -- Heterogeneous Device Networking for an Aml Environment -- Low Cost and Easy to Deploy Real Time Location System Based in Radio Frequency Identification -- METADEPCAS: Introducing Semantic RFID Data Management -- E-Flow: A Communication System for User Notification in Dynamic Evacuation Scenarios -- Subtle Interaction for a Non Intrusive Communication -- Characterizing Mobile Telephony Signals in Indoor Environments for Their Use in Fingerprinting-Based User Location -- Easing Communication Means Selection Using Context Information and Semantic Technologies -- Emergency Event Detection in Twitter Streams Based on Natural Language Processing -- Session 4: Adding Intelligence for Environment Adaptation -- AdapteR Interoperability ENgine (ARIEN): An approach of Interoperable CDSS for Ubiquitous Healthcare -- Understanding Movement and Interaction: An Ontology for Kinect-Based 3D Depth Sensors -- Ontological Goal Modelling for Proactive Assistive Living in Smart Environments -- A Generic Upper-Level Ontological Model for Context-Aware Applications within Smart Environments -- Session 5: Key Application Domains for Ambient Intelligence -- Improving University Quality of Services through Mobile Devices: The Case of the Technological University of Panama -- The Internet of Things to Support Urban Incident Responses -- Mobile System Surveillance for Vehicular Pollutants Emission, Based on Wi-Fi Ad-Hoc Network -- Leveraging the Model-Driven Architecture for Service Choreography in Ubiquitous Systems -- A Case Study for Validating a Prosumer Framework in Drug Traceability Scenarios --Plate Location and Recognition Using Blob Analysis -- Applying Ambient Intelligence to Improve Public Road Transport -- Towards a Train-to-Ground and Intra-wagon Communications Solution Capable of Providing on Trip Customized Digital Services for Passengers.-Reducing Drivers' Distractions in Phone-Based Navigation Assistants Using Landmarks -- Pervasive System for the Local Tow-Truck Service --Early Vehicle Accident Detection and Notification Based on Smartphone Technology -- Session 6: Workshop on Urban Applications and Infrastructures (UrbAI) -- An Ontology-Driven Framework for Resource-Efficient Collaborative Sensing -- Enabling Citizen-Empowered Apps over Linked Data -- The Citizen Road Watcher -Identifying Roadway Surface Disruptions Based on Accelerometer Patterns -- Participatory Sensing for Improving Urban Mobility -- Risky

Driving Detection through Urban Mobility Traces: A Preliminary Approach -- Ambient Urban Games for Reducing the Stress of Commuters Crossing the Mexico-US Border -- User Statistics and Traffic Analysis of Public Internet Access in Buses -- Sentiment Characterization of an Urban Environment via Twitter.

## Sommario/riassunto

This book constitutes the refereed proceedings of the 7th International Conference on Ubiquitous Computing and Ambient Intelligence, UCAmI 2013, held in Guanacaste, Costa Rica, in December 2013. The 46 research papers presented together with 8 papers of the workshop UrbAI 2013 were carefully reviewed and selected from numerous submissions. The papers are grouped in topical sections on human interaction in ambient intelligence, ICT instrumentation and middleware support for smart environments and objects, adding intelligence for environment adaption, and key application domains for ambient intelligence.
