	Nota di contenuto	Chapter 1: Introduction: A Peculiar Defense of God -- Chapter 2: Rational Belief in God -- Chapter 3: Irrational Belief in God -- Chapter 4: The Design of Life and the Laws of Nature -- Chapter 5: The Origin

of the Universe -- Chapter 6: The Problem of Suffering -- Chapter 7: Intractable Religious Disagreement -- Chapter 8: Why Advanced Science and Philosophy Support Humility -- Chapter 9: The Experience Argument for God -- Chapter 10: Two Troubles with Agnosticism.

Sommario/riassunto

This book contains a unique perspective: that of a scientifically and philosophically educated agnostic who thinks there is impressive—if maddeningly hidden—evidence for the existence of God. Science and philosophy may have revealed the poverty of the familiar sources of evidence, but they generate their own partial defense of theism. Bryan Frances, a philosopher with a graduate degree in physics, judges the standard evidence for God's existence to be awful. And yet, like many others with similar scientific and philosophical backgrounds, he argues that the usual reasons for atheism, such as the existence of suffering and success of science, are weak. In this book you will learn why so many people with scientific and philosophical credentials are agnostics (rather than atheists) despite judging all the usual evidence for theism to be fatally flawed. Bryan Frances is Associate Professor of Philosophy at United Arab Emirates University.
